- **COMPLETE DISPERSAL  
OF 2020 & OLDER  
CHAROLAIS FEMALES**
- **EMBRYOS**
- **GROUP OF 2021 FEMALES**
- **Angus, Charolais &  
Copperhead Bulls**

Cover Photo - Colorado Haymakers, Cortez, Colorado

This is a family operation that was homesteaded in 1930 by the Carver's Grandfather. Very unique operation - cattle are grazed in the summer on Forest Service Permits in the San Juan National Forest and winter graze in northwest New Mexico on BLM permits. Interesting to note that basically, winter graze is only mineral! Very powerful short grass! Mountain grazing is around 8,000-10,000 elevation. These cattle are hardy and survivors.

Carvers produce extremely high quality horse hay consisting of orchard grass, timothy, brome with a shot of alfalfa in it. This hay sells to California, Florida, Massachusetts, Texas, Louisiana, etc. Strictly a hay and cattle operation.

The cowherd started in 2003 with a purchase of 50 females from Cowan & Son, Montana. The Cowan family were customers for over 20 years of Fink Genetics. Carvers currently run 25-30 bulls on the cowherd. The cowherd is Angus and Charolais, Angus (1/2 each) purchased from Trent Knobbe, Sharon Springs, KS (also a longtime customer). The hybrid cows have worked extremely well! Cortez is 30 miles from the "4 Corners" in Southwest Colorado. The annual rainfall in this area is 8" per year!

Cows are coming off the mountain range in this photo. Beautiful country.

## Sale Location

Fink Beef Genetics Sale Facility is located:  
Approximately 22 miles northwest of Manhattan on Hwy. 77.  
Approximately 35 miles south of Marysville on Hwy. 77.  
Approximately 25 miles east of Clay Center on Hwy. 24, then north on Hwy. 77 approximately 8 miles.

The sale facility is approximately .8 of a mile north of Randolph Short Stop gas station on Hwy. 77, on west side of the road. If coming from the North, watch for signs after crossing the Fancy Creek bridge, approximately 1/2 mile from our turn.

## Pre-sale Friday evening, April 12

At Fink sale headquarters. Look through the cattle at your leisure with food and drinks available. Gambling tables open.

## Breakfast, Saturday morning, April 13

Rolls, donuts, coffee and juice will be available the morning of the sale.

## Sale Day Lunch

Lunch will be available at the bull sale, compliments of Finks.

## Terms and Conditions

The cattle will sell under the Standard Terms and Conditions as recommended by the American Angus Association and the International Charolais Association, however the Fink guarantee is the best in the Nation and stands behind the bulls with guarantee outlined in this catalog.

## Livestock Mortality Insurance

Representatives from American Livestock Insurance Company will be at the sale to assist you with mortality insurance for your purchases.

## Inspection of Cattle

All cattle may be seen after 3:00 p.m., Friday, April 12th as we will be transporting the bulls to the sale location until then. To view before the 12th, contact the Fink Ranch. Please call ahead for viewing if possible.

## Liability

All persons who attend this sale do so at their own risk, legal or otherwise, for their safety and the behavior of the animals. The owner, sale management firm, and the sale staff assume no liability for property loss or accident that may occur.

**If the weather is bad, contact us for further information, and watch our FaceBook page for updates or call one of the individuals below before heading out.**

### *Sale letter from 1993 sale!*

*Anyone can breed numbers - we have tried all along to combine EPDs with udder quality, disposition, structure, mothering ability and the "cow look". We can't gamble the future of our cow herd on unproven bulls, and neither can our customers!*

We don't change our vision for fads on extremes. Right or wrong. Note in Kris Ringwalls article in the catalog. Average values in several traits may be where commercial producers should be!

We have passed up a lot of money by not chasing and playing games of extremes for nearly 45 years. Don't plan to start now.

Thanks for keeping us in the seedstock business. We will do our best to provide genetics producers can rely on.

*Galen*

**\*\*Buyers Sight unseen form\*\***

-Total confidential

-Contact us- we will send a predesigned form to get our recommendations for your operation.

-Please request at least 1-2 weeks ahead of the sale so we have time to do a thorough job for you.

**\*\*Pedigrees are represented with BOLD GREEN:**

1. Sire

2. Maternal grandsire

3. Maternal great grandsire

-These bulls represent 87% of the genetics.

-Registration number can be searched to get complete pedigree.

Angus: [www.angus.org](http://www.angus.org). Click on search menu and type registration number.

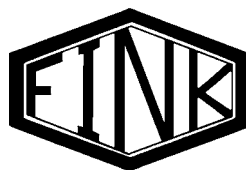

Charolais: [www.charolaisusa.com](http://www.charolaisusa.com). Scroll to Charolais search and click on animals.

\*Due to catalog deadlines and even 1st class mailing, sale day supplement sheets will include:

-Actual Scrotals- measured last week of March.

Galen, Lori, Megan, Whitley and Chad

**BEEF GENETICS**  
*For over 46 Years!*

Broadie Family

# Bull Buyer Information

## FREE DELIVERY in Continental U.S. (this is only on bulls)

\* Any states. (California at this time we will have to meet at the border due to private truckers used).

\* Delivery will start the day after the sale

\* We must keep semi-trucks on interstate roads due to loads. We will ask if necessary that you meet them at a location deemed for safe unloading. Stockyards or acceptable unloading facilities will be required. We appreciate your understanding. Obviously not all stops can be in daytime.

## GUARANTEES

### **Announcing the first 3-year guarantee since 2010, that we know of...Another Fink Industry First!!**

All bulls have been evaluated for structural soundness, fertility, and disposition. At Finks you keep FULL salvage value.

Starting fall 2010, the following policy has been in place.

### **1st Year Guarantee - Single Bull Pasture**

Full coverage for 12 mos. from date of purchase while in breeding pasture only.

- ~ Broken penis in single sire pasture
- ~ Structural problems due to feet, swollen hocks.

### **50% coverage purchase price - Multi-sire group of bulls**

- ~ Broken penis
- ~ Stifle
- ~ Broken legs
- ~ Lightning
- ~ Disposition

+Exception: Foot rot, nails in hooves; penile cuts due to wire, corn stalk leaves, etc; illness, diseases, freeze damage, testicle injury, etc.

+Any reproductive injuries must be examined by a veterinarian within 48 hours of injury. Quick treatment can cure many problems. Injuries not checked and treated promptly will not qualify for 50% coverage. A letter from your vet will be requested.

+WE DO NOT GUARANTEE BULLS TO FREEZE SEMEN!

### **3-Year Guarantee**

\* Any bull sold by Finks that proves to be structurally unsound, infertile, due to foot shape, swollen hocks or failure to pass a complete BSE exam is guaranteed for 36 months from the sale date.

\* That guarantee will apply providing the bulls incapacity is not caused by injury, disease, or founder since leaving Finks. The value remaining is calculated on the basis that the guarantee is reduced by one-third of the purchase of each year of service.

\* A veterinarian certificate must be supplied by the purchaser. Fink reserves the right to have a bull semen tested by two different veterinarian clinics, if requested.

It is important to understand that normal care must be taken and good husbandry practices observed, as we cannot fully replace a bull that is injured or dies for any reason. We recommend you insure animals against injury. This includes not putting younger and older bulls together; and having too many bulls in a relation to too few of cows.

Any guarantees will be covered by satisfactory bull replacements, if available, or credit on future bull purchases for the amount covered.

## SIGHT UNSEEN PROGRAM

\* If you can't make the sale, we will do our best to represent the bulls to you.

\* Rest assured we do NOT share any private conversations with anyone about price or potential interest.

\* Please call preferably 1-2 weeks ahead of the sale. Your needs will be discussed and then we prefer to send you a list of bulls to look at- then you can bid online or your preference.

\* You can leave bids with us, and we will buy the bulls as cheap as we can, our first choice is you bid yourself.

\* Our program is built on trust and honesty.

## FINK CUSTOMER MARKETING

\*Special calf sales in 1995, commercial female sales 1996, Genetic Credit, feedlot, and alliance partnership. We have been a leader on customer marketing, giving presentations in 27 states, Canada, and Mexico.

- E-mail blasts on customers selling cattle, or private treaty sales - No matter where or when - FREE.
- Genetic credit for individual carcass results
- Feedlot Connections
- U.S. Premium Beef
- Genetics, marketing, consulting FREE
- Creekstone Farms - Jake 620-218-0128

## LOCAL DELIVERY

\$50 per bull discount for bulls picked up within 4 days of the sale.

## HEALTH

\*All bulls at Finks must pass a complete BSE test before 14 month of age- or they don't get another chance.

\*We do not sell bulls that might jeopardize fertility in resulting females.

\*Any older bulls selling will be BSE and Trick tested according to each states law, plus semen checked at 12 months also!

\*All bulls are vaccinated by our veterinarian at semen check. Bulls received lepto-vibro, poured, BVD negative checked. Complete health program in place.

## EPD'S - DNA- current as of February 1st.

\*Angus and Charolais bulls are DNA tested.

## SALE ORDER

\*Bulls will sell in sire group order in the catalog.

\*Angus, Charolais, Cooperheads, Charolais Females.

Semen testing bulls 35 to 40 days prior to turnout is recommended for all herds. Generally, bulls retested 30 days (+ -) do retest OK, but it can cause panic when tested a few days before turnout!

# ***Bull Buyer Information (Continued)***

## **SCROTAL**

\* Because of catalog deadlines, we cannot get scrotal measurements in the catalog.

\* They will be represented actual measurements the last week of March.

\* Available on our website and supplemental sheet on sale day. Measurement will be e-mailed to you if you desire.

\* Our bulls are not fat- scrotal is real - not fat filled.

## **1/2 SEMEN INTEREST**

\* Since 1994 we have retained a semen interest in every bull sold. You own 100% of the bull and full salvage value. We may want to collect a bull at our expense and your convenience to use in our program. Any potential semen sales will be split 50/50 along with any costs. Please call for more details.

## **FREEZE BRANDING**

Experiment continues- for 6 years we have been working on reduced time with liquid nitrogen. We continue to get closer. Bear with us, please! It is much quicker and much cheaper. Hopefully we can get data for customers to use also! 2" numbers were used on these bulls.

## **ACTUAL INFORMATION**

We have not included actual weights for many years on birth or weaning. We will have weights on the bull's sale day. Due to our large embryo program- a high use of proven sires the best info to use is the EPD's. This allows genetic influence. (Ex: a calf that sucks 3 cows and has a huge weaning weight- just more milk- not from genetics necessarily).

## **LIVE DISCUSSION**

Live discussion on several topics on our website. We call a spade a spade of how we build our program and give you our thoughts on many issues.

## **2023-2024 COOPERATORS**

Since 1989 we have worked closely with cooperator herds on embryo implantation in expanding our numbers. This includes commercial operations that run Fink females. This has proven to be a workable option for both parties. We believe the beef business is about working together. In some cases the breeders may show other than Fink on the registration certificate, but rest assured they are guaranteed with the same genetics, service and conditions. Any problems, should they occur, will be handled by Finks.

Joe & Tom Ryan  
Doyle Creek Cattle  
Blooming Hills Charolais (our niece, Jan Beene)

# Make a great maternal herd

I am aware of only a few great maternal herds. I am sure there are some of which I am unaware. However, there are not nearly enough. By great maternal herds I mean those that achieve pregnancy rates of 92% to 96% through good years and bad, with little hay feeding and minimal supplementation of protein and minerals.

There are many herds that get good conception rates through reliance on much winter hay feeding, and good doses of supplemental protein and minerals, and sometimes even grain and total mixed rations. Those are not great maternal herds because there is a high probability that they are unprofitable — especially in the tough years.

As I continue to work as a speaker for livestock producer meetings, I hear more and more stories of herds where conception rates were in a range of 90% to 96% a decade or two ago. Now they struggle to get conception rates exceeding 80%.

As I question further, it becomes apparent that their cows have gotten too big, are trying to produce more milk than their environments will allow, and have too little or even no heterosis. These cows have lower body condition in spite of often being fed much more in the wintertime. The owners are now either running fewer cows or buying more feed.

The great maternal herds are those that are more profitable at

the ranch level. The cows have these characteristics: very good fertility, longevity, good udders, good feet and legs providing good locomotion, disease and parasite resistance, calving ease, young age at puberty, good disposition, and great mothering ability.

This does not mean lots of milk, but the ability to deliver a healthy calf, stay mothered on pasture moves or long drives, and teach the calf to eat and live in its environment.

These cows may not wean the biggest calves, but the calves grow well for the environment in which they are raised. While the calves may not perform as well in the feedlot as terminal-sired calves, they should have very acceptable growth rates and feed conversion if they are slaughtered on time. The calves may even excel for the grass-fed niche.

**The great maternal herds** are characterized by cows that get pregnant as yearlings and again as 2-year-olds. They are good mothers raising good calves to an acceptable weaning weight. They maintain good body condition, using mostly grazed feed with minimal supplementation.

Because of their self-sufficiency, they enable a significant reduction in the need for overheads such as calving facilities and tools, and haymaking and feeding equipment along with labor and fuel. Such herds produce increased turnover resulting from their innate fertility and survivability.

**Several steps can** be taken to improve maternal traits in herds:

- Over time, reduce dependence on fed feeds and supplementation.
- Keep most of the heifer calves and expose them to bulls and — perhaps over several years — shorten the breeding season to as little as 24 days.

- For cows, gradually, shorten the calving season to 30 days, but don't shorten the breeding season. Create the discipline to cull the late-calving or late-bred cows before the next calving season.

- To make good maternal cows, only select bulls whose dams always calve as a result of first-cycle conception. If you select a bull from a first-calf heifer, ensure she also calved in the first cycle as a 3-year-old before making the selection.

Then, stick to the cow-culling protocol: opens, dries, those with bad dispositions, those requiring individual attention, those that raise poor calves, and ugly ones (your definition, but don't be too tough).

Even in good herds, opens and dries make up most of the culls. If you routinely cull the others, you won't have many to cull in any given year — and you will like your herd.

*Teichert, a consultant on strategic planning for ranches, retired in 2010 as vice president and general manager of AgReserves, Inc. He resides in Orem, Utah. Contact him at [burke-tei@comcast.net](mailto:burke-tei@comcast.net). ■*

## *Angus Bull Introduction*

### **Fink Angus Program ~ Since 1977**

We have seen all the extremes in the beef industry. Every extreme, every time, has led commercial producers down the wrong road. The trouble is generation turnover in the cattle industry is slow. When several problems appear due to extremes, plugging all the holes takes 2 more generations of "Flex Tape" to fix.

We have tried to stay in the middle of the road genetically for over 40 years. Balanced genetics that we feel are the most profit-making long term, for everyone.

Average EPDs for a "maternal" breed such as Angus may be about right. Take note the \$EN, Mature Weight, Scrotal, and Heifer Pregnancy (HP) are as important as "marbling" and yearling weight etc. Producers can go backwards (registered and commercial) chasing single traits, thinking they are going forward. It is very conceivable to gain 100# on mature cow weight in one sire use!!

Making total improvement and keeping expenses (cow costs) down is the goal for profit.

Marbling can be increased quickly with age and days on feed. Is it concerning that feeding time is approximately 45 days longer than it was a few years ago? Weights are increasing and if it's the form of much more fat on a carcass (which it is) how does that compete with pork, chicken and catfish?

The key is to watch "Fat" EPD also! Yes, it is a fine line, but when all traits are not considered then results may end up going in the wrong direction. If it takes extra fat to produce choice and prime, maybe we better use a Wagyu if that is the only goal and to keep the cowherd sound.

Don't forget the cow! Packers really don't care about your cowherd. They just want the end product. Remember just a very few years back a lot of promotion was \$B! We always called it terminal, now the Angus Association does also. How many commercial producers have "Terminal Genetics" in their herds now?

### **Always remember ~**

- \* Fertility in the cowherd.
- \* Control of inputs in cowherd.
- \* Structure and longevity.
- \* 1st and foremost for Profit.

Fink bulls MUST pass a semen BSE by 14 months - No matter when they are sold or they are CANNED. (Highly related to female fertility).

## *Progressive Cattle Podcast*

"I don't know who said it, but it says 'the problems we see today can't be solved at the same level of thinking we were at when we created them.' And I think we're at a place now with ranching where we've used technology, and we made a lot of progress, or I should say we made a lot of change. We're certainly productive and sometimes that additional productivity hasn't been always coupled with greater profitability. And in my opinion, and some people disagree, for many cow-calf operations, I think we've maximized productivity. And there's some data I think from a number of resources that would support that."

Aaron Berger, University of Nebraska - Lincoln Beef Extension Specialist

We will continue to use Intuition in the future. They are solid and complete. Remember the Fink program, for 45 years, have never chased extremes - that includes frame, milk, calving ease, EPDs etc. Right or wrong our customers need balance! Anyone can feed cattle for 18-24 months and make prime! Does that make them the most profitable?

We won't have many sons out of the dam of these bulls anymore. She served as a donor for 6 years at Finks - she was that kind. She is now at Derek Goddards Ranch in North Carolina. We are currently using a full brother to these two bulls naturally. Co-Owned with Shelly and Shan Hullman, Pratt, KS. We will be collecting semen on him.

42

### FINK 331 OF 7329 TESTAMENT

Rarely is a son of "5522" ever offered. "5522" EPDs are really low on growth - he was born in 1982. This particular bull is double bred "5522", fourth generation back. Interesting to see where DNA puts this bull. "5522" daughters last for many years. We probably should go back and use him on everything.

Cross Fulford - Morehaven, FL

Third in calf roping at Jr. National Finals in Las Vegas in 2023 for the 19 and under division. We hope the logo is "grandfathered" in!!

Outcross genetics on the sires side for past customers. Dam is an individual we flushed quite a bit - 1682 daughter that goes back to "5522". "5522" is still one of the best all around bulls that ever walked due to longevity, udder quality and coyote protection. 332 is behind pound wise due to his recipient dam, but his EPDs suggest he will get the job done.

49

Dam of this bull has several sons in this sale. Progeny out of this female are the kind we like to have around us for a cowherd. We continue to use the dam as a donor. Her "Rainmaker 11127" daughters in production are really nice!

*Quick removal of injured bulls is key,  
put them in a small area and let them heal.  
It's no different than a human with sprains -  
rest and reduced activity.*

### Angus Reference Sire

- \* A longtime sire of ABS.
- \* His sons have been very popular in our past sales plus nationwide sales.
- \* We used Stellar because of the success we have had with his sire; Substantial 272.
- \* He is highly proven in all traits and holds up great for high altitude.

53

### FINK 347 OF 1801 STELLAR

DOB: 1/28/2023 Reg #: 20838008 Tattoo: 347

*Stellar x Resource x Final Answer*

Potential Heifer Bull  
on Larger Heifers

CED	BW	WW	YW	RADG	DMI	YH	SC	Doc	PAP	\$EN	HP	CEM	Milk	MW	MH	Claw	Angle	CW	Marb	RE	Fat	\$M	\$W	\$F	\$G	\$B	\$C

### Angus Reference Sire

- \* Overdrive son that we used because of the strength of his cow family.
- \* "Miss" family with the cowmaker "Cedar Ridge" back to a Net Worth daughter. Net Worth daughters are considered by many to be some of the best females in the breed due to their "kind", fertility and udder quality.
- \* Barrett Overdrive is a brother to Super Duty. We bought an interest in both bulls from Barretts and have used both bulls extensively.

13.9	10	28	28	-0.3	.43	.56	25	.35	.51	.019											

Female maker! Steers are important also, but they are only around you once in life - females should be there 10 years plus. Udders will not get any nicer than Dash, K205 and 5522. Producers can do maternal or terminal on daughters of this bull.

59

### FINK 373 OF 5355 9630

DOB: 3/11/2023 Reg #: 20827387 Tattoo: 373

**9630 x 5523 EXT x Cedar Ridge**

CED	BW	WW	YW	RADG	DMI	YH	SC	Doc	PAP	\$EN	HP	CEM	Milk	MW	MH	Claw	Angle	CW	Marb	RE	Fat
15	-1.2	39	74	.18	.49	-0.1	.56	11	.09	3											
9.9	13	38	11	-0.4	.33	.42	15	.41	.17	.046											

Another cowmaker - keep all of the daughters you can. The longest longevity cattle in the breed that I'm aware of, is the Emulation lineage. The dam of this bull is double bred to "5522", then add in Cedar Ridge.

62

### FINK 376 OF 8240 9630

DOB: 4/04/2023 Reg #: 20827390 Tattoo: 376

**9630 x Wisdom x Cedar Ridge**

CED	BW	WW	YW	RADG	DMI	YH	SC	Doc	PAP	\$EN	HP	CEM	Milk	MW	MH	Claw	Angle	CW	Marb	RE	Fat
9	1.4	53	97	.22	.88	0.3	.56	8	-.01	-.4											
14.8	6	32	31	-0.1	.36	.42	29	.39	.45	-.012											

"9630" sons, not extreme in any trait, does that mean they are "average" maybe in EPDs. Wouldn't it be ironic if we all discover, in a few years, that if you look at total PROFIT from a female it may will be the more average EPD females?

60

### FINK 372 OF 3408 9630

DOB: 2/28/2023 Reg #: 20827386 Tattoo: 372

**9630 x Cedar Ridge x Net Worth**

CED	BW	WW	YW	RADG	DMI	YH	SC	Doc	PAP	\$EN	HP	CEM	Milk	MW	MH	Claw	Angle	CW	Marb	RE	Fat
8	1.3	56	106	.24	.81	0.3	.84	9	-.48	-.16											
13.6	7	38	49	-0.1	.36	.52	34	.52	.51	.003											

Cedar Ridge, a bull that we have used a lot in the past (and still have semen) is definitely a proven bull that holds mature cow weight, \$EN, udder quality in place. Could go down as one of the best bulls in the breed.

Lori and Megan with the Riley County Farm Bureau board helping at Flint Hills Breadbasket.

63

# Why do I recommend ... ?

**As a result** of these articles, I get a lot of email. I try to respond to them all. Sometimes the answer is simple. Sometimes it takes a little more thought. All that I recommend comes from many years of experience, including over 40 years in the management of several large operations where we were expected to make a profit. Early on, I decided it was important to really know what works and what doesn't.

It is very easy to get caught up in old wives' tales, paradigm lockdown, good but out-of-context research or just wrong thinking. After you fight your way "out of the box," be careful to avoid building a new box. And, always try to be a systems thinker.

In the next couple of articles, I want to provide some brief answers to questions that are asked. Understand they are far from complete, but have weathered the test of time. Not every idea fits every place, so use them appropriately — but don't be afraid to try.

**So, why do I recommend:**

**Terminal matings?** Do it for greater profitability, simplicity of operations and to facilitate better grazing. Greater profitability comes because every cow can produce a calf to sell. Operational simplicity reduces cost and adds to profit. Improved grazing will ultimately add to carrying capacity and profitability.

**Not buying bred heifers?** You must recognize that they have the

two toughest years of their lives in front of them, plus translocation to your place. Many bred heifers offered for sale have been overdeveloped. Thus, some of them are pregnant and in good condition because of feed and not because they are highly fertile and fit a tougher environment.

**Maternal matings only IF you can sell bred cows?** If you can sell a good number of bred cows for a premium price each year, you can be as profitable as those who terminal-cross.

**Moderate size and milk?** You can simply run more cows on the same land if they are smaller and give less milk. You will wean more pounds of calf per acre and sell those pounds for more money. Smaller cows giving less milk are more fertile in most environments.

**Exposing most of the heifer calf crop to bulls for a short period of time?** Even with EPDs and genomic testing, no one can select heifers for your ranch as accurately as the bull and nature. Regardless of any other genetic differences, heifers that calve later as 2-year-olds cannot live long enough to catch up with those that calve early. Remember, this is your cow herd. It is supposed to be profitable every year.

**Minimal development of replacement heifers?** It costs less. The heifers that are truly, innately fertile are the ones most likely to

breed. Research is showing that heifers can breed reasonably well when they reach 55% of expected mature cow weight. If you are calving in sync with nature, you will get good conception rates; the open heifers will be profitable as feeders because of lower cost.

**Selecting bulls from cows that always calve in the first cycle for maternal herds?** I personally think the heritability for first-cycle conception in heifers and for calving interval between the first and second calf is higher than most of the estimates we see for fertility.

**Selecting the right seedstock provider?** Commercial cattle producers have paid so much money for the wrong kind — high-growth, high-carass — for so long that seedstock providers are incentivized to do the wrong thing for commercial maternal herds. You need to find someone who will help you find bulls to produce functional and efficient females — moderate size and milk, physical soundness, high fertility on low inputs, calving ease, survivability and good longevity. The seedstock provider should help you include heterosis for better fertility and survivability in your cows. ■

## *Charolais Bull Introduction*

**Hybrid Vigor Works.** Depends on the producer's marketing program if they want to use it or not. Putting the right proven pieces together is the key. The data is now available to do that, unlike in the 1970 helter skelter programs.

Charolais are the highest marbling of all continental breeds. Many Fink customers are hitting 97-100% choice and prime on Angus, Red Angus and Baldie females. That's around 13-14 months, calf feds and rarely a yield grade 4. That kind competes with catfish, chicken and pork!! Not all cattle can do that, 45-60 days more feed time, higher death rates in feedlots and fatter cattle are not the answer.

We have said this for many years, with selection, as should be for any replacements, the best cows we have seen that hold their condition, breed back, and raise thick power calves are Char cross females. More producers are discovering that every day. Plus, they work in all climates. Hybrid Vigor again at work. Several Fink customers are running these cows currently.

Our industry has marbling at the highest rate ever recorded. That is great for consumers! But sadly, in doing that yield grade 4/5 cattle have also increased, as a direct result of not enough pounds of red meat. Too much "white" fat cost lots of money to put on a carcass. Trim the "white fat" genetically. It's very possible!!

We started Charolais as an option for customers to blend hybrid vigor with a quality carcass. More red meat yield and a "terminal" (and a potential maternal) end product with more pounds (free) for some customers, it works!

White bulls handle the heat very well. In some of the toughest climates we have customers in. White bulls are out breeding, and others are hiding in the trees, FACT!

Not all white bulls are created equal like any other breed. We have been fortunate to line genetics up that grow, yield, have quality grade, and rank at the top of the breed for TSI, Marbling, Weaning, and Yearling weights, are just a few, along with acceptable birth weights and unbelievable disposition.

## *Charolais 18 Month Old Bulls*

All of these bulls were semen checked as yearlings - they are not carry over bulls because they couldn't pass semen as young bulls. Of course all of these bulls will be re-checked in March before the sale.

Here is a really nice Benaiah son. He's the right kind to sire a set of super smoke calves. Want to put an extra jump on your moderate framed, maternal bred cowherd? That would be possible here.

Megan and Chad are District 1 Directors for Young Farmers and Ranchers.

- \* Greg Myers in Kentucky owns this bull with us.
- \* He was our high selling bull four years ago.
- \* Unbelievable Free Lunch son out of the "6868" female.
- \* Sons have been very popular in past sales both registered and commercial.

- \* The best bull of any breed that we have worked with. Disposition that he passes to his calves is unbelievable.
- \* At this age the EPDs are normally depressed by younger bulls (with less accuracy), Gold Standard is still top 20% WW, 15% YW, 3% Carcass and 15% TSI.
- \* Considering all traits, he may be one of the most proven, balanced bulls in the breed.
- \* Generally a teat and udder improver on his daughters.

Maybe some of (if not the best) Gold Standard sons ever offered. Producers might make note the dam "4294" has ranked in the top 1% in the breed with a #3 ranking, for marbling this year. Also she is a full sister to the "Free Lunch" x 6868 daughters that dominate the breed for marbling EPD, and has for several years. Some of these bulls could fit a lot of progressive registered programs. Updated individual EPDs will be available sale day.

Natural standout since birth on 3109. Long, thick, and extra pounds. 3177 is an embryo that came in lighter due to his recipient dam, but he has caught up. He is deep bodied and extra pounds also. Imagine a set of steers and replacements out of these two. Dam entered the circle of donors in 2020 - she produces.

Real nice Gold Standard out of a female we flushed several times in the past 10 years. Tom Greco is using her in his IVF program now. Many sons and maternal brothers to this bull have been sold. Many sisters remain. Moderate sized cowherd - terminal cross on part of them?

*Customer service is as important at Finks as anything. Even calf sales in the early 1990's!!*

## Spring 2023 Charolais Bulls

Terminal use only for these bulls. The dams udder gave out on us. We do push marbling in our Charolais genetics - BUT we don't give up calving ease or growth. Bulls like these can easily sire 95% or higher Choice on a set of British cows when fed right and you won't be staring at a bunch of 4 and 5 yield grade discounts. Remember a lot of fat trimmed goes to foreign lean beef shipped in! Updated individual EPDs will be available sale day.

Trim finish fat genetically. As cattle in the feedlots get older and more feed fed in feedlot we as an industry are seeing a higher percentage of YG4 and YG5 cattle. Yes weight pays, but costs also increase. Charolais cross calves can be fed hard, convert feed, still quality grade at 13-14 months and STILL HAVE WEIGHT!!

Many producers have been swayed to look at the EPDs strictly on any breed of bulls when considering what to do for the future. This bull has true muscle, not bunched butts from years past. Can only imagine what a set of calves from a bull like this will look like a weaning time.

Solid pair of bulls, certainly could be used to make replacements. Remember those smokie or copperhead cows will be genetically more fertile, better longevity, and their calves pounds heavier due to heterosis. Ask Shan & Shelly Hullman at Pratt, KS or Johnson Farms of Dwight, KS, what they think of the cross. Updated individual EPDs will be available sale day.

\* There is no proven bull in the world, that we are aware of, that puts together a set of EPDs as Silver Gun 467 does. Perfect? No - but pretty close.

\* He represents the top 1% WW, 1% YW, 4% MCE, 3% MTL, 1% SC, 2% Udder, 1% Teat, 1% CW, 1% REA, 3% Marb., and 1% TSI!!!

\* He has worked well on Fink females, we feel. The base of Gold Standards and Free Lunches females have blended well.

\* The disposition has been great also, plus they have great feet!

The dam may well be the best all around Charolais female we have ever owned at this point. Beautiful udder, feet, kind, etc... A full brother to this bull topped our Fall 2023 sale for \$25,500, for 1/2 interest, going to Sandmeier Charolais in South Dakota. A maternal brother topped our 2023 Spring sale going to Wade Small, Idaho; Cody Runft, Kansas and Herbbertt Charolais in Nebraska for \$41,000 for 1/2 interest.

An incredible marbling cow family in the breed. Megan sold a full sister to the dam of this bull for \$24,000 as a five year old. That cow held the number one marbling (of all Charolais Females) for several years. She's now #2 as a seven year old! Larsons lost the dam of this bull. Here is the only opportunity for this mating and cow.

Charolais bulls will add ribeye, take fat off genetically, quality grade and rarely 4's or 5's. If we are to feed the world - I'm not sure where a large number of 4's and 5's yield grade fit in the future? Fat is very costly to add on any animal.

- \* One of the very unique bulls in the Charolais breed. Rarely does a bull of any breed put it all together like Free Lunch. Remember these are PROVEN EPDs on an older sire. Top 20% BW, 30% YW, 1% SC, 8% Udder, 5% CW, 1% Marb., 20% TSI.
- \* Incredible bull to use on a set of any kind of cows. Great disposition, guts, good muscle and #7 of ALL PROVEN SIREs for marbling in the breed.
- \* Note carcass weight is still TOP 4% of the breed. Feeding your own cattle?
- \* We have found Free Lunch daughters to have more milk than his EPDs show.
- \* Free Lunch semen is nearly depleted.

The dam of these bulls is one of the power Gold Standard daughters. She's out of the cow family that is arguably the prominent marbling family in the breed worldwide. "White" muscle (fat) is costly to put on, cattle that grow, gain, convert and still grade high quality are important.

"923" sons bring a lot of marbling to the table. Fink Charolais producers do not give up growth or carcass weight. We try to make a balanced package, with lots of marbling! This bull is double bred to Megan's "6868" female family.

1980's Angus Field Day - Gary Johnson on the microphone and the late Andy Olson (one of the greatest cowmen ever). The late Richard Spader (plaid shirt) Vice-President of American Angus Assoc. and retired Ron Bolze - great friend from NE.

Let the Cow Save You Money, and the Bull Make You Money

By Kris Ringwall

*We've reprinted a portion of Kris' article, with permission,  
Let the cow save you money and the bull make you money, below.*

*Read Kris' full article and others at:*

*[www.ag.ndsu.edu/dickinsonrec/beef-talk-articles-1](http://www.ag.ndsu.edu/dickinsonrec/beef-talk-articles-1)*

... Second, recognize the importance of monitoring cow size. **The maintenance of excessively large cows has proven difficult to offset with increased weaning weights.** The center has targeted mature cow size at 1,100 to 1,300 pounds. Although individual calf weights will be lighter, total **calf weight based on calves produced per acre will be greater, resulting in more total pounds of calf.**

Third, recognize the importance of good bull selection using technological advancements that improve accuracy. Generally, keep expected progeny differences (EPDs) above the **50th percentile within the desired traits and breed.** As matter of practicality, become comfortable with bulls that are above the 50th percentile but may not exceed the upper 30th percentile for commercial production.

Fourth, recognize the value of breeding systems, maximizing the traits of interest in the **terminal sire program while balancing appropriate traits on the maternal side.** **Let the cow save you money and the bull make you money.**

# *Copperhead Bull Introduction*

## **1/2 Charolais x 1/2 Red Angus (started in 2017)**

We believe in options for customers. Everyone's program needs to be geared to fit and make the most profit for their operation. We all make decisions every day in ranching and farming, like feed, seed, etc. Genetics from Finks is the same way.

If we didn't believe in options working for customers, we wouldn't do it. These bulls are working! Plus, they are generally light colored for heat, and add a "red" hide option for many customers!

Copperheads are the result of finding Red Angus. A.I. bulls that have some data on them that include controlled birth weight, carcasses, and still excellent growth. We then A.I. all our virgin Charolais heifers (not just the lower end) to these bulls, to create Copperheads. These are not just cross bulls!!!

Customer feedback from New York, West Virginia, Georgia, Florida, Missouri, Kansas, Oklahoma and Texas have been excellent. Number one thing mentioned is fleshing ability on the bulls. They hold up and get cows bred and the calves have a touch of extra Charolais muscle in them.

We highly recommend Copperheads for making replacements if desired also. That input of Charolais on a set of Red Angus, Beefmaster, Brahman, etc. based cows can give that hybrid vigor to a set of cows to control cow size, more muscle, and longevity.

Remember Fink virgin females, which are the newest and freshest Charolais genetics we have, are the dams of most of these bulls! Red Angus sires are highly selected also!

Always a power set of bulls - moderate framed, thick, deep, huge testicles, fertile!

Copperheads used on straight black Angus cows (none with red genes) you should expect black hides, a few may have black hides and smoke hair.

### *Red Angus Reference Sires*

***Peltons Wideload 78B***

***RAA#1704763***

We have used Wideload for a couple of years and really like what we get. He's average in the Red Angus breed for birth weight, top 40% YW and top 9% Marbling. He's backed up by females from the Pelton herd in LaCrosse, KS who we have a lot of respect for.

***STRA Relentless***

***RAA#3955293***

We have used Relentless this past year for trying to keep our Copperheads on a replacement, and feeder type genetics on cowherds. He's in the top 2% for low birth weight, and 1% for marbling.

147

**FINK 3127 OF 0459 WIDE**

DOB: 3/14/2023 Reg #: MP5548 Tattoo: 3127

**Wideload x Gold Standard x Free Lunch**

Dam ranks in the Top 1% WW, 1% YW, 4% SC, 1% CW, 15% RE, 1% Marb., 1% TSI. Dam is a power female, look at where she ranks in the entire female population of the breed! Wideload sons are full of muscle, deep, and great disposition. Copperheads are amazing critters, and what they are getting done!

153

**FINK 3121 OF 1561 WIDE**

DOB: 3/19/2023 Reg #: MP5543 Tattoo: 3121

**Wideload x Free Lunch x Gold Standard**

Dam ranks in the Top 2% CE, 1% BW, 1% SC, 25% CW, 3% Marb., 15% TSI. Wideloads normally all look a lot alike in their kind. Another double bred Free Lunch Dam!

148

**FINK 3123 OF 1564 WIDE**

DOB: 3/06/2023 Reg #: MP5544 Tattoo: 3123

**Wideload x Free Lunch x Gold Standard**

Dam ranks in the Top 8% CE, 15% BW, 2% SC, 8% Marb. Wideload - Free Lunch - Gold Standard, not showing is Free Lunch again on pedigree. He is one of the sought after bulls in the breed due to calving ease, marbling, disposition, etc. Semen on Free Lunch sold for \$625/straw in a past sale.

154

**FINK 3118 OF 1533 RELENTLESS**

DOB: 3/08/2023 Reg #: MP5540 Tattoo: 3118

**Relentless x Free Lunch x Gold Standard**

Dam ranks in the Top 6% SC, 15% CW, 2% Marb., 25% TSI. We hope folks will like these Relentless sons. He is a calving ease sire with good growth and outstanding marbling. These bulls can be used on any kind of cow, and then keep for replacements also! This is a pretty good bull.

149

**FINK 3115 OF 1526 WIDE**

DOB: 3/28/2023 Reg #: MP5539 Tattoo: 3115

**Wideload x Free Lunch x Gold Standard**

Dam ranks in the Top 3% CE, 7% BW, 10% WW, 10% YW, 1% SC, 15% CW, 2% Marb., 6% TSI. Super nice Wideload - another Free Lunch - Gold Standard - Free Lunch pedigree! We have already flushed the dam, and 5 generations of cows on the bottom side have been flushed. Copperheads are working in many environments.

155

**FINK 3120 OF 1560 RELENTLESS**

DOB: 2/28/2023 Reg #: MP5542 Tattoo: 3120

**Relentless x Gold Standard x Free Lunch**

Dam ranks in the Top 15% YW, 6% Marb., 9% TSI. Dam of this bull is deep, powerful, thick and out of one of our top female lines. Grandam is currently working in Issac Hughes registered program in Mississippi. She was flushed a lot at Finks, then Tom Greco's.

150

**FINK 3108 OF 8002 WIDE**

DOB: 3/14/2023 Reg #: MP5537 Tattoo: 3108

**Wideload x Gold Standard x Free Lunch**

Dam ranks in the Top 10% CE, 15% BW, 5% WW, 3% YW, 10% SC, 2% CW, 2% Marb., 1% TSI. Dam is a donor. A son sold last Fall to Frank Turner in AL for \$13,000. We are collecting semen and using that bull in our program. A daughter sold for \$25,000 in the Sale of Excellence last Spring.

156

**FINK 3124 OF 1565 RELENTLESS**

DOB: 3/24/2023 Reg #: MP5545 Tattoo: 3124

**Relentless x Gold Standard x Free Lunch**

Dam ranks in the Top 1% WW, 1% YW, 6% SC, 1% CW, 2% RE, 6% Marb., 1% TSI. This bull ratioed 112 in his weaning group. His dam's EPDs (rankings in the entire breed) speak for themselves. Copperheads work in any environment and provide hybrid vigor in a nice package.

151

**LCC 3102 OF 1527 WIDE**

DOB: 3/08/2023 Reg #: MP5550 Tattoo: 3102

**Wideload x Gold Standard x Free Lunch**

Dam ranks in the Top 20% YW, 20% CW, 1% Marb., 15% TSI. Dam is being flushed by Larsons. Grandam was the top marbling EPD female in the breed for three years straight, now she's dropped to #2, in the entire BREED. We don't make copperheads using bottom end cows!

157

**FINK 3114 OF 1525 WIDE**

DOB: 3/07/2023 Reg #: MP5538 Tattoo: 3114

**Wideload x Free Lunch x Gold Standard**

Dam ranks in the Top 15% WW, 2% YW, 1% SC, 1% Marb., 1% TSI. Copperheads make great replacements, they give a touch more punch than a straight Red Angus but still have great carcass. Sometimes (many times it's happened in fads) the beef industry loses sight of what is most profitable chasing fads. Consumers need great products, ALWAYS, remember pounds of quality, not fat is profitable.

152

**LCC 3100 OF 0464 WIDE**

DOB: 3/13/2023 Reg #: MP5549 Tattoo: 3100

**Wideload x Gold Standard x Free Lunch**

Dam ranks in the Top 15% WW, 2% YW, 2% SC, 1% CW, 15% RE, 1% Marb., 1% TSI. Wideloads are very impressive. Moderate, wide, deep, thick and with great dispositions. Many of these bulls could be recommended for replacements. We bought a fush on the dam from Larsons - that's what I think of her (and Megan made me pay for it).

*Bulls can be viewed online at  
finkbeefgenetics.com or dvauction.com.  
Watch the website for details and posting dates.*

158

**FINK 3119 OF 1556 RELENTLESS**

DOB: 3/14/2023 Reg #: MP5541 Tattoo: 3119

***Relentless x Gold Standard x Free Lunch***

Dam ranks in the Top 7% CE, 9% BW, 20% SC, 7% Marb.

Moderate framed Copperhead out of a first calf heifer. Gold Standard and Free Lunch dam.

160

**FINK 3125 OF 1566 WIDE**

DOB: 3/30/2023 Reg #: MP5546 Tattoo: 3125

***Wideload x Gold Standard x Free Lunch***

Dam ranks in the Top 9% WW, 10% YW, 4% SC, 20% CW, 3% Marb., 6% TSI.

A younger bull here that is out of a first calf heifer. He is made very complete. Profit in the beef industry must come from different areas, it can't just be end product. The cowherd with fertility is the start. Copperheads are fertile!

159

**FINK 3126 OF 1567 WIDE**

DOB: 3/25/2023 Reg #: MP5547 Tattoo: 3126

***Wideload x Free Lunch x Gold Standard***

Dam ranks in the Top 4% CE, 15% BW, 15% WW, 5% YW, 2% SC, 2% CW, 2% Marb., 3% TSI. Marbling, still with visual muscle, not always the case in high marbling cattle. Copperheads can be used to sire those top steer carcass cattle and super replacements.

161

**LCC 3103 OF 1528 WIDE**

DOB: 3/06/2023 Reg #: MP5551 Tattoo: 3103

***Wideload x Gold Standard x Free Lunch***

Dam ranks in the Top 20% WW, 8% YW, 4% SC, 25% CW, 1% Marb., 4% TSI.

Copperheads add hybrid vigor (FREE), muscle, longevity on replacements, fertility, plus carcass. Blending the Red Angus and Fink Charolais.

Mike Cole, Beverly, KS; uses Copperheads on his Red Angus cowherd. One of the best sets of cows and calves I've ever ran into!! Moderate cows with huge calves.

# Fink Beef Genetics Pre-Sale Social & Casino Night

**Friday Evening, April 12 @ Fink Beef Genetics Sale Facility**

Food, refreshments and an all-out good time as you visit with friends in the industry, at poker, craps, and blackjack!

## *Complete Dispersal of our 2020 and older females!!!*

Three years of mis-management of our grass because of too many head has caught up with us. We have tried to back off with selling some females every sale, but the time has come to absolutely back off, and cut back, due to three dry years, at the wrong times of the year.

Many donors, past or presently flushing, are in this offering. This is not a "sorting" offering. These cows are all here because they made the cut. This dispersal is cows that look the part, number up the part, feet, udders, teats, disposition, were important DECADES ago. Any footnotes will include any issues that we are aware of, we try to be completely transparent in any of our business deals.

From a genetic standpoint we think the cows speak for themselves. Highly proven pedigrees, full of bulls that have sired hundreds/thousands of calves help create less mistakes/surprises for new owners.

Many in this offering rank in the top 3% (many in the top 1%) of the entire breed for marbling, but not giving up growth, maternal or deep soggy cows. "Kind" must always be important!

The Charolais breed is in the strongest position potentially of any breed, making great strides on marbling, but not giving up growth, true muscle, etc. Fat is expensive to put on market cattle. Fat, AGE, makes pounds and higher quality - not necessarily rocket science. Charolais have the muscle, ability to grow and still have quality grade. Presently yield grade 4 and 5 cattle rarely receive a discount. A few years ago they were hammered on price. Trimming fat will not feed more world population economically! Charolais trim it genetically! No better cross in the industry. Don't ever forget white handles heat!!

The future is bright for the Charolais breed. Ask any feedlot manager or packer. We all must pay attention to genetics, birth weight and especially calving ease, fertility and then growth and carcass. There will be more females offered in this sale, that rank high in marbling, than any sale ever offered at one time, in the world!!

LCC Miss Lady 6333 023 FL

Fink Miss Lady 8007 4294 GS

Fink Miss Lady 6362 019 FL

# Information for Females

## Auctioneer

Matt Lowery  
308-750-6119

**Females sale will begin shortly after the bull sale ends. Bull sale will be quick so make sure you are logged onto DV Auction by 2 CST for females.**

## Consultants

Dennis Adams, Outfront Cattle Service .....	979-229-4472
Brett Sayre .....	573-881-1876
Duane Whiting .....	304-377-9179
Bob Morton .....	931-842-1234
Brandon Neely .....	256-613-3586

Clint Rusk .....	765-491-9437
Colt Keffer, CK Sales .....	765-376-8784

## EMBRYOS ARE IN SOME FEMALES

These are not recipient cows, most are donor cows themselves! These are females that we put embryos in as we moved all spring calving cows to fall. These are the females that bred to ET! We had no plans of dispersing our 2020 or older females at that point. Females carrying embryos sell under the following conditions:

**\*If a female results Finks retain 1/2 interest in that heifer calf.**

**\*If a bull results - Finks retain 1/2 interest and the bull will sell in our bull sale on joint ownership.**

Please call for more details!

## JOINT BULLS MERCHANDISING

Any resulting bull calves from the sale females, embryos or future bulls from these females are eligible for our Joint Program that meet our criteria. We like customers to have options to maximize their purchases.

## Pictures

We apologize for no pictures. January has been a mess. Every female will be videoed and the videos will be available on or around April 1st on our website.

## Video

Every female will be videoed and hopefully the video will be on the website by April 1st. We may have some pictures, later on. Video will show the cows movement, we like that, plus I hate taking pictures!

## EMBRYOS SELLING IN THE SALE

**Embryos selling are noted IVF or conventional. We make no guarantees on conception. Embryos are high quality embryos.**

## Marbing EPD

Certainly breeders need to look at EPDs across the board. Single trait selection has never worked for extremes, NEVER. Commercial producers need the total profit package. It is interesting on the Feb. 1, 2024 release that Fink genetics account for:

Top 100 for marbling - 33 for year 2018

Top 100 for marbling - 43 for year 2019

Top 100 for marbling - 37 for year 2020

But still have growth and kind!!!

## Pregnancy Status

Females will be ultrasounded by February 15, 2024. Some will be sooner and we will include in this catalog all we know for sure. Others will be on our website after April 3, 2024. A final ultrasound and pregnancy check will be done a few days before the sale. All confirmed bred females will be guaranteed for 45 days pregnancy after sale day. Notification must be made immediately to us if there is any issues. Most suggested calving dates are approximate.

## EPDs

Current as of Feb. 1, 2024 due to printing of the catalog. All females are DNA tested.

## Insurance

Please insure your purchases ASAP. More information is in the front of the catalog or through your choice of companies. We assume no responsibility for purchases that are not insured.

## Delivery

Delivery on females is at buyer's expense and risk. We will certainly help with arrangements if possible. We cannot load bred females, baby calves, etc. with bulls for safety of the females. If we coordinate delivery, we will guarantee a maximum of \$400 per lot. If we can get it done cheaper, we will by all means do so. We cannot guarantee delivery to your doorstep. When we have loads of cattle, we ask buyers to meet livestock haulers on their route which may not always be in the daytime, plus most will need to be met on Interstate Highways to help expedite delivery.

## PA

Females are noted at bottom of any females that are carriers. We are of the mindset that "don't throw baby out with bath water". The very few carriers in the sale have been flushed and will probably be flushed until sale time if possible. We would caution (just our opinion) that PA can be managed and bred around.

## Service Sires on Females

\* LCC 923 - EM931950 (PA Carrier)

\* Fink 2126 of 7982 467 - EM984974

Purchased for \$25,500 by Sandmeier Charolais at Bowde, SD.

\* Fink 2261 of 8002 467 - EM985015

Purchased for \$13,500 by Frank Turner & Son, AL; David Innis Mgr.

We have never priced this female. At present she has created \$183,750 in sales that is strictly bull sales, as we've never sold daughters until this sale (0249 - Lock & Load daughter). Sons are working at Hebberts, NE; Paul Jeffries, KY; Wade Small, Idaho; Cody Cattle, KS; Tedro, PA; Sandmeier, SD for a total of 12 different states. Only one flush was ever offered, ask Tom Greco, KS, how that worked for him! Beautiful udder and feet on this female. We are retaining 11 daughters. Flushes great and embryos have excellent conception. Open currently as we have been flushing her. Could be argued as one of, if not the top female in the breed.

If you created a list of Gold Standard daughters that cover a lot of bases. 7551 would be in the very top end. Power cow, power family, double bred New Standards cow family. Sons have sold \$6,750, \$5,000, etc. Dam is a donor at Frank Turners in AL. Ask them about her! Flush sold to Sheppard Charolais, KS for \$4,250. Retaining three daughters and hope to have a bunch more coming up. Opportunities come and go, we were slow on this one, someone won't be after the sale. Currently flushing, updated breeding information will be available after April 3, 2024. Remember the rankings on these 2017 females are competing with every Charolais female in the breed. ALL HERE - ALL PROVEN!

Very complete female, moderate thick, good kind, with great feet, udder and disposition. She has garnered up \$38,500 in sales in bulls alone. Keeping 6 daughters and still flushing her. Last two IVF flushes have yielded 7 and 12 good embryos. Matt Anderson in Texas has a daughter. We will continue to flush this female through sale time. Breeding information will be available after April 3, 2024.

Perfection Family, double bred! Creating "like" genetics is hard to find. We like concentrating families of similar traits. The dam is a full sister to the dam of the second female in this sale "7551". Mike Brown, OK, bought a daughter for \$4,500. Retaining several daughters of this female. Flushed a lot last year. Nice udder, feet and disposition. Breeding information will be available after April 3, 2024

Ty Wickline, WV bought a flush on this cow in 2022, he has several calves! A full sister to the dam of this beautiful female sold to Riverdale Charolais in MO in the recent Denver sale for \$33,000. Rick Hale, MO purchased a full sister in blood for \$9,000 in our 2023 sale. This female can run with any female in the breed - in all areas. Last IVF flush yielded 14 good embryos. Watch video on this female, you be the judge! Numbers kinda work to! We will continue to flush until sale time. Breeding information will be available after April 3, 2024

A very nice female. Her first son sold for \$7,000. Flushed once the conventional and currently flushing IVF. Grandam is a full sister to M6 New Standards dam. Double bred "248". Another female that normally would not be for sale at this young of an age. Teats are a touch longer on this female. Not bad, just upfront is how we try to operate. The dam of this female generated over \$120,000 in sales at Finks. We will be flushing until sale time. This female has an embryo - Dam is 2308 (EF1338924) she sold in our sale last Fall for \$8,000 to Mike Brown, OK. She is a full sib to the \$25,000 pick of heifers to Ankony and the Frank Turner-Dave Innis herdsire (\$13,500) "Fink 2261" that we have collected and are using. Sire of this embryo is M6 New Standard. Imagine that mating! Due date is August 19, 2024.

Only daughter of "7982" we have ever offered for sale. This one is only because it is a complete dispersion of 2020 females! Here she is. Could arguably be one of, if not the best, Lock & Load daughters in the breed. Beautiful female, udder and teats, feet, etc! EPDs aren't to bad either. First bull calf sold for \$7,500. Her dam has created nearly \$200,000 in sales - and she is far from being done. We will IVF this female before sale time. She has been flushed once conventionally. Due approximately September 12, 2024 to Fink 2261.

A full sister to LCC Hondo that we bought in a past sale from Larsons for \$6,500 and Tom Greco, Aristo bought one also for \$8,000. Ask Tom what he thinks! Both have beautiful udders. The dam sells in this sale also "653". We had no intention of selling this female for several years. We are using "Hondo" in our program. Power into a pedigree that maybe has more highly proven bulls for marbling than any! We are currently flushing this female. Due approximately September 16, 2024 to Fink 2261.

Full sister to Lot 167. Only in this dispersal would we ever think of letting these females go at this age. Note EPDs of the marbling cow family in the breed. This female is like "068", beautiful udder and teats, disposition, etc. Hard to find females with this "kind" and genetic background. This one is another sweetheart! Breeders can spend years putting a package like this female together, 073 is there and ready. We will be flushing this female before sale time. Ask David Hobbs about a full sister, "8008" that Larsons have to this female! Due to calve approximately September 20, 2024 to Fink 2126.

First son sold to Hilliard Ranch, FL for \$7,000 last Fall.

Moderate frame, complete, nice udder, teats, feet and disposition. Breeders can set in this sale and put together a set of like bred, proven pedigrees, with multiple generations of Fink females. A yearling maternal sister sold for \$4,500 to Charles Rosson, VA. Nice female to make a contribution. Wonder what "467" mating might look like on this female! We hope to find out as we plan to flush her this spring. Number one for marbling in 2020 born females in the entire breed. Breeding information will be available after April 3, 2024

1st of  
all females born in  
2020 for marbling.

This female is fairly impressive to look at plus her EPDs

aren't to shabby. The dam generated over \$200,000 in sales for us on bulls and females. Tom Greco, Aristo bought "3834" as a ten year old cow in 2022. Ask Tom if that's paid out OK! The first bull of "0454's" sold for \$7,000 last fall. Kyle Reeves in TN bought a full sister for \$5,750 in 2022. We will try to get embryos yet this spring on "0454". Teats are a touch longer, certainly not a problem.

**Carrying an embryo sired by MCF Mr. Silver Gun 467. Donor dams were pooled with either "073" (Lot 169) or "0386" (Lot 173). Calving date is approximately August 19, 2024.**

We purchased this female from Hargrave Charolais for \$6,000 in our Fall 2022 sale. Her bull calves at side sold for \$7,500 in last Falls sale. This female doesn't necessarily have extreme numbers but she does represent our program. Bella Angel Farm, TX bought the dam of this female from Hargraves last Fall for \$7,000. Angela knows! "0409" in the pedigree and is a full sister to Lady "023" selling in this sale. We'd like to get a boat load of daughters from "0386" yet. Currently flushing. Due approximately October 15, 2024 to LC 923.

A full sister to "068" and "073", plus the power cow of Larsons "8008". Ask David Hobbs about her! On these kind of females we will continue to use the genetics and work around PA. We would suggest on the right kind for future beef production, "don't throw the baby out with the bath water". We will be flushing this female up to sale time.

**This female is a PA carrier.** Due to calve on August 21, 2024 to SCM Double Overtime F1016 (M950559), a bull from Marv Stipe, that we sampled this fall.

Double bred "Free Lunch"! High proven genetics are very reliable. Accuracy is maybe the most important thing to look at. Double bred New Standard genetics on the dams side. First son sold for \$5,500, Daren Statler, PA bought a full sister for \$6,500 and another sister brought \$4,000 to Tom Greco, of Aristo. Only in a dispersal would these "kind" (all arounds) be offered. It would take years of breeding to get where this female already is!! Due September 12, 2024 to RR Silver Sage (M950726) - a "467" son bred by Jeff Roman, Oregon. We have calves and like them very much!

68th of  
all females born in  
2022 for marbling.

Deep, soggy, moderate Lady family! "4X6" way back is the dam of Megan's "6868" female. LCC "8857" a Free Lunch out of 6868 recently sold to Bill Nottke, Riverdale Charolais for \$33,000 in Denver. Another full sister to "8857" is the #1 marbling female in the breed born in the year 2019. There is power in genetics. First son of "0303" sold to Mike Cole last fall for \$6,000. Issac Huges, MS, purchased the dam of "0303" in our 2022 sale. The udder on this female is a touch deeper but the teats are fine.

**Carrying an embryo sired by MCF Mr. Silver Gun 467 and the dam LCC Miss Lady 0460 4295 GS ET (1307436). Check the pedigree and EPDs out on this one. Due to calve on August 19, 2024.**

This sale will be broadcast live on the internet.

**DVAuction**  
 Broadcasting Real-Time Auctions

Real time bidding & proxy bidding available.

We will be selling choice on these 3 females, then choice on the two left and then sell the last one!

"9001" is one attractive female and has the EPDs to match. Double bred to the "248" female that was used by many herds across the US. A touch of Free Lunch in there doesn't hurt. Everything considered, this female could be the high seller of the sale. You might want to look her and her full sisters up. We have flushed all three. She has a very nice udder and teats, feet and disposition to boot. The dam of this female, and the next two sisters, has generated over \$200,000 in sales. This female missed top 100 for marbling at .34! Listing stopped at .36.

**Carrying an embryo sired by MCF Mr. Silver Gun 467 and the dam Fink Lady 8002 3864 GS (EF1265696). Resulting calf is a full sib to the \$25,000 Ankony heifer, \$8,000 Mike Brown heifer and the \$13,500 Turner bull "Fink 2261". Due to calve on August 19, 2024.**

Gold Standard kind, deep, soggy, great disposition, etc. Semen on him is limited - more daughters will be dispersed in this sale than will be available again in the breed. First son sold for \$6,500 and full brothers in the past sales to this female have totaled over \$40,000. A Hondo son in this sale out of the "5780" will find some friends. The two front teats of this female set up a touch higher. Due to calve approximately September 28, 2024 to "Fink 2126" the Sandmeyer \$25,500 "467" son.

Two sons have sold for \$6,000 and \$5,000. Gold Standard semen is limited, many breeders consider the Perfection family one of the best, for decades, this sale offers as much Perfection bloodlines than anywhere we'd guess? Breeders, we hope will consider the kind, EPDs, degree of high accuracy in ALL traits, and give these three full sisters a glance. Honestly we could see all of them having a chance to be a "move maker" in the breed in the future. Dispersal is the only reason they are selling! This female missed top 100 for marbling at .35! Listing stopped at .36. She has been flushed. Due approximately September 9, 2024 to "Fink 2261".

Three of these full sisters offered. They are all the same kind. This female dropped in her tail head some after flushing conventionally. Sometimes, for some reason, this can happen - ask anyone who has flushed conventionally a lot. Guarantee she was the same kind as 9001 and 9003 in her rump structure. It was a drug issue, it will not change her production or her calves. Maybe the best one of the three. One son so far sold for \$5,500. Due approximately September 18, 2024 to "Fink 2126".

Great Gold Standard with volume, kind, disposition and well balanced traits across the board. In the times we have sold "pick of the herd" at the Sale of Excellence, this female got more than one look to fulfill that order. One son sold for \$7,000. Raile Charolais at St. Francis, KS had a lot of success selling "Fink 2250" sons across the US. Double bred to New Standard, slick haired, low bw, growth and carcass! We have flushed this female quite a bit. This female can be taken any direction desired. Due approximately September 18, 2024 to Fink 2261.

Retaining two daughters. One son sold for \$6,500. "3821" was flushed heavily by Aristo, Tom Greco then she was purchased by Issac Huges in MS for a donor in his elite program. "3821" has 32 progeny so far with the Assoc. L.G. Herndon, GA purchased a full sister to "9314" for \$6,000 as a yearling heifer. She has been in our embryo program. "9314" came in heat in October, tried to cross a tight barbed wire fence and cut herself up pretty bad in front of her udder. It has healed up but we aren't going to make any guarantees on how it will shape up at calving. Try to find another female that looks like this one. Could be one of the top females in the sale!! We are currently flushing her. Due to calve approximately September 16, 2024 to Fink 2261. **Selling 1/2 Interest.**

The Charolais breed has made great comebacks in the past ten years. Females like this that rank in the top 1% of the breed for marbling have helped make feeders and packers love the Charolais cross. We have a decent amount of commercial customers that are hitting 97%-100% choice and prime at 14 months and no yield grade 4's or 5's. Four sons of this female have sold for \$7,500, \$7,500, \$6,500 and \$5,500. That's another way to measure performance. A daughter by LCC Hondo is being shown by Emma Roberts in OK. This cow has been a donor and will be flushed more before the sale. Breeding information will be available after April 3, 2024

55th of  
all females born in  
2019 for marbling.

Loren Sylvan, NE bought a "467" daughter last fall for \$5,500. We are retaining two daughters also. The dam "5778" sells in this sale. "5778" is a full sister to "6333" that sold to Ankony for \$24,000 and held the #1 position of ALL Charolais females for three years. "5778" ranks 9th for marbling for all females born in 2015. We have flushed this female. Teats are a touch longer, not bad. Big difference. Due to calve approximately September 14, 2024 to Fink 2261.

Hopefully this female will find some friends. She's pretty nice. A full sister sold to L.G. Herndon, GA for \$6,000. Retaining a daughter and we have flushed this female. The grandam created over \$70,000 in sales at Finks, a bunch at Tom Greco's of Aristo and now is a donor for Issac Huges in MS. We are retaining younger full sisters to "9056". Only in a dispersion!! Due to calve approximately August 20, 2024 to Fink Cowtown, the \$41,000 son of "7982" by New Standard.

In all probability her 18 month old LCC Hondo son will be our lead off bull in the sale. The dam sold to Ten-Ten Ranch in MO, at private treaty. The Mary family continues to produce power and growth - still top 2% marbling here! Sometimes growth and marbling don't find each other in the top percentiles. Touch deeper udder on this female, teats are fine. Breeding information will be available after April 3, 2024

One of our top Free Lunch daughters ever, with plenty of power, plenty of controlled CE and BW and still top 1% marbling along with 3% CW and 2% TSI. CW is very important to us because our commercial customers get paid on that also! Very impressive female who is always in the final for picks of the herd we've sold for \$18,000, \$24,000 and \$27,000. Tom Greco, Aristo, bought a daughter by "467" last fall for \$12,500. A full brother sold to Rafter P Ranch for \$7,000 (commercial producer). Obviously will be flushed until sale day. Breeding information will be available after April 3, 2024  
Selling 1/2 Interest or the option to double the bid to own all of her.

Rick Evans, TX has a full sister in blood that sold last fall for \$8,000. Another full sister in blood produced Hermdons high selling bull last fall for \$31,000. Four sons have sold for \$21,000 and more to come. The dam "4293" was a donor for Frank Turner and Dave Innis, AL. "4293" is a full sister to Riverdales \$33,000 purchase at Denver out of the #1 marbling female LCC 982. Five other full sisters are still producing at Larsons. This female does have a vertical crack in one front foot at this time. Due approximately September 4, 2024 to Fink 2261 the Frank Turner "467" son out of Lot 193.

This female just barely missed the top 100 females born in 2018 for marbling. Video won't be pretty due to years of flushing her but she produced a pick from "Sale of Excellence" in 2023 to Ankony for \$25,000 of our heifer calves. Mike Brown, OK, was paying attention last fall and bought a \$8,000 full sister. Sons have sold for \$13,500, \$8,500, \$8,000, \$6,500 and \$5,500. We co-own the \$13,500 "2261" son with Frank Turner in AL and have collected him and are using him! Retaining 4 daughters and still flushing. Due approximately October 8, 2024 to Fink 2126.

LCC Hondo's dam. Two full sisters sold to Tom Greco, Aristo, for \$8,000 and Finks purchased one for \$6,500 (and yes we paid for her). This female has potentially the most level, best uddered female we've ever seen anywhere. Ask Dennis Adams! Tom Greco, Aristo bought a flush on "653", ask him about the calves he's got on the ground! We are retaining 4 daughters. This female did not dilate last fall, so we c-sectioned her calf and it was approximately 80 lbs. (We'll give you our vets phone number.) She has had several natural calves and no issue. We continue to flush her. A flush in January 2024 yielded 6 reverse sort for females to Free Lunch. We will continue to flush her until sale time. Any questions on this female please call. Breeding information will be available after April 3, 2024

Green bars here - best part she's the real deal. We will have females that would take a better picture, but honestly not sure if they could have any better production. This female has worked her way up the chain with 4 sons totaling \$31,500. We are flushing her pretty hard, and will continue through to the sale. Moderate, great footed, great uddered, and productive. No holes in her background either! Retaining every daughter. Due approximately October 1, 2024 to "LCC 923".

023 is the dam of "6333" which was Ankony's pick of the herd for \$24,000. Last direct daughter of 6868 that sold was in Denver for \$33,000 with lots of bidders. This female, at this time, has produced over \$110,000 in sales. We have produced several full sib embryos to "6333" from this female, that have not been put in yet. She has a "fair" 467 yearling daughter that records: Top 1% WW, 2% YW, 3% MCE, 20% MTL, 2% SC, 1% Udder, 1% Teat, 1% CW, 6% REA, 2% Fat, 8% Marb., and 4% TSI. and one of the (if not) the heaviest of our yearling heifers, which is approximately 30 head. **THIS HEIFER IS NOT FOR SALE!!!** Still has some good in her we think. She still has a beautiful udder, teats, feet and moves like a cat. Still flushing. Breeding information will be available after April 3, 2024. **PA CARRIER.**

As mentioned earlier, females never have enough progeny (like bulls) to move their EPDs very far over time. DNA is still somewhat low accuracy in the overall picture. This female is a **FULL SISTER** to Ankony 6333 female that was the #1 Female for Marbling for three years in the entire breed, that sold for \$24,000. Foundation female - she will be flushed until sale time. If you could see her yearling "467", and soon to be weaned "467" heifer, you would know why!!! Breeding information will be available after April 3, 2024

9th of all females born in 2015 for marbling.

Emma Roberts, OK, showing her LCC Hondo heifer last fall.

**198A** IVF Embryos - 2 unsexed by WCF Mr Silver Gun 467.

This female will have some friends. Power "923" daughter, prepotant sire of marbling, growth and kind. Grandam of this female "2697" is a full sister in blood to M6 New Standard. This female is pretty nice! Because we moved all of our spring calvers to fall this female is carrying an embryo. Due approximately July 15, 2024: Sire: WCF Silver Gun 457. Dam: Fink Perfection 7545 (Lot 166). **PA CARRIER.**

Penny Flash daughters are rare to find. We have very little semen left. When mated to the right cows they can be very productive. Ask Tom Cannon in Iowa! The dam of this female sold to Kuester Ranch in MO last spring for \$5,750. Absolutely one of the best buys of any female we've ever sold. Wait until "7755" x "467" sons sell in this sale! Teats are a touch longer on this female. Due approximately September 4, 2024 to Fink 2126.

Travel the U.S. and Canada and see how many top 1% - 2% females are selling in one sale. I'm sure it's not as many as we are selling. Power, guts, disposition, feet, etc. Wonder why this power cow is top 1% for marbling? Flash, Free Lunch, Gold Standard are in the pedigree! Maternal sisters to 1871 sold to Ankony for \$25,000 and Mike Brown for \$8,000, and 4 are NOT for sale! Fall brother to them went to Frank Turner for \$13,500. The dam "8002" sells in this sale. We are flushing her alot before sale day. Due approximately September 4, 2024 to SCM Double Overtime F1016 (950559).

## 206 FINK PERFECTION 1655 3833 GS

We have built a lot of our program around the Perfection line of cattle, slick haired, last in all environments from California, Oregon, Maryland, South Florida and Mexican breeders also. Most times we have them wrapped up top and bottom with Duke 248. Udder for some reason isn't as pretty on this female. Due to calve approximately August 3, 2024 to RR Silver Sage (M950726), a top "467" son we are using from Jeff Roman, his calves look really nice.
