

38th Bull & Female Sale
Saturday, October 21, 2023

12:00 PM CST · Randolph, Kansas

**Charolais
Bulls**

**Angus
Bulls**

**Copperhead
Bulls**

**Angus
Females**

**Charolais
Females**

Cover: Davies Ranch, Liberal, Kansas. Pictured left to right: Bob Davies, Sophie Davies (daughter) and Leonard Cochran, Herdsman.

Owned by Bob and Carol Davies. Bob and Carol recently celebrated their 56th wedding anniversary. They use a program of Angus cows and Charolais bulls. Located in dry Southwest Kansas, with average rainfall of 17 inches. The famous Cimmaron River runs through much of their ranch. Short grass country where 20 acres per cow is allotted. Approximately 600-800 cows graze the 12,000 acre ranch, depending on the moisture. Fink customers since 2005.

This sale will be broadcast live on the internet.

Sale Location

Fink Beef Genetics Sale Facility is located:

Approximately 22 miles northwest of Manhattan on Hwy. 77.

Approximately 35 miles south of Marysville on Hwy. 77.

Approximately 25 miles east of Clay Center on Hwy. 24, then north on Hwy. 77 approximately 8 miles.

The sale facility is approximately .8 of a mile north of Randolph Short Stop gas station on Hwy. 77, on west side of the road. If coming from the North, watch for signs after crossing the Fancy Creek bridge, approximately 1/2 mile from our turn.

Pre-Sale, Friday, October 20th

Food, poker tables, visiting all at Fink Genetics Sale Facility.

Breakfast, Saturday morning, October 21st

Rolls, donuts, coffee and juice will be available the morning of the sale.

Sale Day Lunch

Lunch will be available at the bull sale, compliments of Finks.

Accommodations

Clay Center, Marysville and Waterville all have highly recommended motels if you cannot get one in Manhattan.

Internet Failure

Although highly unlikely, if something did happen we will stop the sale for approximately 15 minutes to allow bidders to make a phone connection.

Terms and Conditions

The cattle will sell under the Standard Terms and Conditions as recommended by the American Angus Association and the International Charolais Association, however the Fink guarantee is the best in the Nation and stands behind the bulls with guarantee outlined in this catalog.

Livestock Mortality Insurance

Representatives from American Livestock Insurance Co. will be at the sale to assist you with mortality insurance for your purchases.

Inspection of Cattle

All cattle may be seen after 2:00 p.m., Friday, October 20th as we will be transporting the bulls to the sale location until then. To view before the 20th, contact the Fink Ranch. Please call ahead for viewing if possible.

Liability

All persons who attend this sale do so at their own risk, legal or otherwise, for their safety and the behavior of the animals. The owner, sale management firm, and the sale staff assume no liability for property loss or accident that may occur.

If the weather is bad, contact us for further information, and watch our Facebook page for updates.

Thank you for taking time to look at our sale catalog. We know everyone is busy and realize the only way we can provide seedstock is because of your support. We will do our best to provide options for customers - maternal Angus, Charolais and Copperheads. Straight breeding, cross breeding or placing genetics together to hit the best profit center for you is our goal!

Genetics has been our mission for over 45 years and counting. Megan is taking hold and doing a nice job. Our work force is Megan, Lori, and I. Nick Hargrave and Chad help out on occasion working cattle. We appreciate the producers we work with on embryo recipient herds. We are all in this together.

We appreciate producers giving us a shot at their business. In return, we give volume discounts, and guarantees unmatched in the world. Every bull must pass a complete BSE by 14 months of age or else. We don't fatten the bulls. We offer free delivery in the US on bulls, etc. Check out the back cover on the program pluses.

We have seen many fads, chases, extremes, etc. in the beef industry through the years. Progress is hard to measure just in EPDs. Finks keep common sense and will never give up structure or fertility chasing EPDs or fads alone. We have seen the effects of extremes in many areas for 60 years.

Galen

Galen, Lori, Megan, Whitley, and Chad

Broadie

NEW UPDATES FOR FALL 2023!!

****Volume Discounts****

3%- 4 bulls or more

7%- 8 bulls or more

10%- 12 bulls or more

12%- 15 bulls or more

We print our volume discounts to be completely transparent for our customers.

****Buyers Sight unseen form****

-Total confidential

-Contact us- we will send a predesigned form to get our recommendations for your operation.

-Please request at least 1-2 weeks ahead of the sale so we have time to do a thorough job for you.

****Pedigrees are represented with BOLD GREEN:**

1. Sire

2. Maternal grandsire

3. Maternal great grandsire

-These bulls represent 87% of the genetics.

-Registration number can be searched to get complete pedigree.

Angus: www.angus.org. Click on search menu and type registration number.

Charolais: www.charolaisusa.com. Scroll to Charolais search and click on animals.

Bull Buyer Information

FREE DELIVERY in Continental U.S. (this is only on bulls)

* Any states. (California at this time we will have to meet at the border due to private truckers used).

* Delivery will start the day after the sale

* We must keep semi-trucks on main roads due to loads. We will ask if necessary that you meet them at a location deemed for safe unloading. Stockyards or acceptable unloading facilities will be required. We appreciate your understanding. Obviously not all stops can be in daytime.

GUARANTEES

Announcing the first 3-year guarantee since 2010, that we know of...Another Fink Industry First!!

All bulls have been evaluated for structural soundness, fertility, and disposition. At Finks you keep FULL salvage value.

Starting fall 2010, the following policy has been in place.

1st Year Guarantee - Single Bull Pasture

Full coverage for 12 mos. from date of purchase while in breeding pasture only.

- ~ Broken penis in single sire pasture
- ~ Structural problems due to feet, swollen hocks.

50% coverage purchase price - Multi-sire group of bulls

- ~ Broken penis
- ~ Stifle
- ~ Broken legs
- ~ Lightning
- ~ Disposition

+Exception: Foot rot, nails in hooves; penile cuts due to wire, corn stalk leaves, etc; illness, diseases, freeze damage, testicle injury, etc.

+Any reproductive injuries must be examined by a veterinarian within 48 hours of injury. Quick treatment can cure many problems. Injuries not checked and treated promptly will not qualify for 50% coverage. A letter from your vet will be requested.

+WE DO NOT GUARANTEE BULLS TO FREEZE SEMEN!

3-Year Guarantee

* Any bull sold by Finks that proves to be structurally unsound, infertile, due to foot shape, swollen hocks or failure to pass a complete BSE exam is guaranteed for 36 months from the sale date.

* That guarantee will apply providing the bulls incapacity is not caused by injury, disease, or founder since leaving Finks. The value remaining is calculated on the basis that the guarantee is reduced by one-third of the purchase of each year of service.

* A veterinarian certificate must be supplied by the purchaser. Fink reserves the right to have a bull semen tested by two different veterinarian clinics, if requested.

It is important to understand that normal care must be taken and good husbandry practices observed, as we cannot fully replace a bull that is injured or dies for any reason. We recommend you insure animals against injury. This includes not putting younger and older bulls together; and having too many bulls in a relation to too few of cows.

Any guarantees will be covered by satisfactory bull replacements, if available, or credit on future bull purchases for the amount covered.

Testing bulls 35 to 40 days prior to turnout is recommended for all herds. Generally, bulls retested 30 days (+ -) do retest OK, but it can cause panic when tested a few days before turnout!

SIGHT UNSEEN PROGRAM

* If you can't make the sale, we will do our best to represent the bulls to you.

* Rest assured we do NOT share any private conversations with anyone about price or potential interest.

* Please call preferably 1-2 weeks ahead of the sale. Your needs will be discussed and then we prefer to send you a list of bulls to look at- then you can bid online or your preference.

* You can leave bids with us, and we will buy the bulls as cheap as we can, our first choice is you bid yourself.

* Our program is built on trust and honesty.

FINK CUSTOMER MARKETING

* Special calf sales in 1995, commercial female sales 1996, Genetic Credit, feedlot, and alliance partnership. We have been a leader on customer marketing, giving presentations in 27 states, Canada, and Mexico.

- E-mail blasts on customers selling cattle, or private treaty sales - No matter where or when - FREE.
- Genetic credit for individual carcass results
- Feedlot Connections
- U.S. Premium Beef
- Genetics, marketing, consulting FREE
- Creekstone Farms - Jake 620-218-0128

LOCAL DELIVERY

\$50 per bull discount for bulls picked up within 4 days of the sale.

HEALTH

* All bulls at Finks must pass a complete BSE test before 14 months of age- or they don't get another chance.

* We do not sell bulls that might jeopardize fertility in resulting females.

* Any older bulls selling will be BSE and Trick tested according to each states law, plus semen checked at 12 months also!

* All bulls are vaccinated by our veterinarian at semen check. Bulls received leptovibrio, poured, BVD negative checked. Complete health program in place.

EPD'S - DNA- current as of August 20.

* Angus and Charolais bulls are DNA tested. Charolais are current as of 8/4/23 and Angus are current as of 9/1/23.

SALE ORDER

* Bulls will sell in sire group order in the catalog.

* Angus, Charolais, Cooperheads, Charolais Females, Angus Females, Angus Semen.

SCROTAL

* Because of catalog deadlines, we cannot get scrotal measurements in the catalog.

* They will be represented actual measurements the last week of September.

* Available on our website and supplemental sheet on sale day. Measurement will be e-mailed to you if you desire.

* Our bulls are not fat- scrotal is real - not fat filled.

1/2 SEMEN INTEREST

* Since 1994 we have retained a semen interest in every bull sold. You own 100% of the bull and full salvage value. We may want to collect a bull at our expense and your convenience to use in our program. Any potential semen sales will be split 50/50 along with any costs. Please call for more details.

Bull Buyer Information (Continued)

FREEZE BRANDING

Experiment continues- for 6 years we have been working on reduced time with liquid nitrogen. We continue to get closer. Bear with us, please! It is much quicker and much cheaper. Hopefully we can get data for customers to use also! 2" numbers were used on these bulls.

ACTUAL INFORMATION

We have not included actual weights for many years on birth or weaning. We will have weights on the bull's sale day. Due to our large embryo program- a high use of proven sires the best info to use is the EPD's. This allows genetic influence. (Ex: a calf that sucks 3 cows and has a huge weaning weight- just more milk- not from genetics necessarily).

LIVE DISCUSSION

Live discussion on several topics on our website. We call a spade a spade of how we build our program and give you our thoughts on many issues.

2023-2024 Cooperators

Since 1989 we have worked closely with cooperator herds on embryo implantation in expanding our numbers. This includes commercial operations that run Fink females. This has proven to be a workable option for both parties. We believe the beef business is about working together. In some cases the breeders may show other than Fink on the registration certificate, but rest assured they are guaranteed with the same genetics, service and conditions. Any problems, should they occur, will be handled by Finks.

Angus Bulls

ANGUSGS
Powered by Neogen GeneSeek

We DNA both the Angus and Charolais bulls. The results will be reflected in the EPDs. DNA is like

any other tool - just keep everything in perspective on how you use it. We are trying to, hopefully, present to you the most current data to level environmental differences. Because of our large embryo program, cooperator herds, etc., environment can play a large role in actual weaning and yearling weights.

As always, please contact us with any questions.

Angus and Charolais bulls' EPDs have been genomically enhanced using Neogen GeneSeek through Angus Genetics, Inc.

Rick Pfortmiller, 785-230-9507, rpfortmiller@neogen.com

**Burke
Teichert**

Make a great maternal herd

I am aware of only a few great maternal herds. I am sure there are some of which I am unaware. However, there are not nearly enough. By great maternal herds I mean those that achieve pregnancy rates of 92% to 96% through good years and bad, with little hay feeding and minimal supplementation of protein and minerals.

There are many herds that get good conception rates through reliance on much winter hay feeding, and good doses of supplemental protein and minerals, and sometimes even grain and total mixed rations. Those are not great maternal herds because there is a high probability that they are unprofitable — especially in the tough years.

As I continue to work as a speaker for livestock producer meetings, I hear more and more stories of herds where conception rates were in a range of 90% to 96% a decade or two ago. Now they struggle to get conception rates exceeding 80%.

As I question further, it becomes apparent that their cows have gotten too big, are trying to produce more milk than their environments will allow, and have too little or even no heterosis. These cows have lower body condition in spite of often being fed much more in the wintertime. The owners are now either running fewer cows or buying more feed.

The great maternal herds are those that are more profitable at

the ranch level. The cows have these characteristics: very good fertility, longevity, good udders, good feet and legs providing good locomotion, disease and parasite resistance, calving ease; young age at puberty, good disposition, and great mothering ability.

This does not mean lots of milk, but the ability to deliver a healthy calf, stay mothered on pasture moves or long drives, and teach the calf to eat and live in its environment.

These cows may not wean the biggest calves, but the calves grow well for the environment in which they are raised. While the calves may not perform as well in the feedlot as terminal-sired calves, they should have very acceptable growth rates and feed conversion if they are slaughtered on time. The calves may even excel for the grass-fed niche.

The great maternal herds are characterized by cows that get pregnant as yearlings and again as 2-year-olds. They are good mothers raising good calves to an acceptable weaning weight. They maintain good body condition, using mostly grazed feed with minimal supplementation.

Because of their self-sufficiency, they enable a significant reduction in the need for overheads such as calving facilities and tools, and haymaking and feeding equipment along with labor and fuel. Such herds produce increased turnover resulting from their innate fertility and survivability.

Several steps can be taken to improve maternal traits in herds:

- Over time, reduce dependence on fed feeds and supplementation.
- Keep most of the heifer calves and expose them to bulls and — perhaps over several years — shorten the breeding season to as little as 24 days.
- For cows, gradually, shorten the calving season to 30 days, but don't shorten the breeding season. Create the discipline to cull the late-calving or late-bred cows before the next calving season.
- To make good maternal cows, only select bulls whose dams always calve as a result of first-cycle conception. If you select a bull from a first-calf heifer, ensure she also calved in the first cycle as a 3-year-old before making the selection.

Then, stick to the cow-culling protocol: opens, dries, those with bad dispositions, those requiring individual attention, those that raise poor calves, and ugly ones (your definition, but don't be too tough).

Even in good herds, opens and dries make up most of the culls. If you routinely cull the others, you won't have many to cull in any given year — and you will like your herd.

Angus Bull Introduction

Fink Angus Program ~ Since 1977

We have seen all the extremes in the beef industry. Every extreme, every time, has led commercial producers down the wrong road. The trouble is generation turnover in the cattle industry is slow. When several problems appear due to extremes, plugging all the holes takes 2 more generations of “Flex Tape” to fix.

We have tried to stay in the middle of the road genetically for over 40 years. Balanced genetics that we feel are the most profit-making long term, for everyone.

Average EPDs for a “maternal” breed such as Angus may be about right. Take note the \$EN, Mature Weight, \$B, and Heifer Pregnancy (HP) are as important as “marbling” and yearling weight etc. Producers can go backwards (registered and commercial) chasing single traits, thinking they are going forward. It is very conceivable to gain 100# on mature cow weight in one sire use!!

Making total improvement and keeping expenses (cow costs) down is the goal for profit.

Marbling can be increased quickly with age and days on feed. Is it concerning that feeding time is approximately 45 days longer than it was a few years ago? Weights are increasing and if it's the form of much more fat on a carcass (which it is) how does that compete with pork, chicken and catfish?

The key is to watch “Fat” EPD also! Yes, it is a fine line, but when all traits are not considered then results may end up going in the wrong direction. If it takes extra fat to produce choice and prime, maybe we better use a Wagyu if that is the only goal and to keep the cowherd sound.

Don't forget the cow! Packers really don't care about your cowherd. They just want the end product. Remember just a very few years back a lot of promotion was \$B! We always called it terminal, now the Angus Association does also. How many commercial producers have “Terminal Genetics” in their herds now?

Always remember ~

- * Fertility in the cowherd.
- * Control of inputs in cowherd.
- * Structure and longevity.
- * 1st and foremost for Profit.

Fink bulls MUST pass a semen BSE by 14 months - No matter when they are sold or they are CANNED. (Highly related to female fertility).

Progressive Cattle Podcast

“I don't know who said it, but it says ‘the problems we see today can't be solved at the same level of thinking we were at when we created them.’ And I think we're at a place now with ranching where we've used technology, and we made a lot of progress, or I should say we made a lot of change. We're certainly productive and sometimes that additional productivity hasn't been always coupled with greater profitability. And in my opinion, and some people disagree, for many cow-calf operations, I think we've maximized productivity. And there's some data I think from a number of resources that would support that.”

Aaron Berger, University of Nebraska - Lincoln Beef Extension Specialist

Justified has been used worldwide with excellent success. If producers are truly serious about maintaining cow size, or reducing it some, this bull can "get r done"! Reminds me some of Cedar Ridge, 5522, etc. - the kind of bulls that make excellent cows that producers can create more cow profit from. Use a terminal bull on them or create females for other commercial producers - go either way!!!

Angus Reference Sire

We aim to have several daughters of this older proven sire in our herd the next several years. First of all, they make cows, deep bodied and fertile. Scrotal +1.87, Docility +42, Heifer Pregnancy +17.7 and \$M +75, wow! They also have plenty of carcass to create choice and prime cattle. We have less than 30 straws of semen and maybe another 20 are out there at most. We have encouraged customers to take a closer look at these bulls for the past few years. There is a reason!!

We have a few different bloodlines we brought in this year for outcross for past customers and for potential new customers. My judgement to use this bull was based on the cattleman that bred him, Joe Myers. He is a long time friend and I have a high respect for the way he breeds cattle. We have not been disappointed in the cattle.

Angus Reference Sire

15.0	13	22	66	0.6	.44	.39	61	.78	.53	.090

Complete made bull. Dam is a first calf heifer. He is a touch behind due to our "non-fattening" grow ration. The ration is limited so they can only gain so much. We could have bulls weighing 200# plus or more on each one - but that doesn't change the kind of calves they will sire.

*Bulls and females can be viewed online at
finkbeefgenetics.com or dvauction.com.

We sampled Abundance after seeing yearling bulls out of him. We used Net Worth with success and the top side of Abundance goes back to Ideal 692 - a sire that put deep, thick, soggy daughters years ago. A lot of the depth and volume in our cows goes back to Ideal 692 and Rito 549. Several of these sons come in light at weaning. There is good in them. It will come out and won't change the cattle they sire at all.

Angus Reference Sire

Teichert

Why do I recommend ... ?

As a result of these articles, I get a lot of email. I try to respond to them all. Sometimes the answer is simple. Sometimes it takes a little more thought. All that I recommend comes from many years of experience, including over 40 years in the management of several large operations where we were expected to make a profit. Early on, I decided it was important to really know what works and what doesn't.

It is very easy to get caught up in old wives' tales, paradigm lockdown, good but out-of-context research or just wrong thinking. After you fight your way "out of the box," be careful to avoid building a new box. And, always try to be a systems thinker.

In the next couple of articles, I want to provide some brief answers to questions that are asked. Understand they are far from complete, but have weathered the test of time. Not every idea fits every place, so use them appropriately — but don't be afraid to try.

So, why do I recommend:

Terminal matings? Do it for greater profitability, simplicity of operations and to facilitate better grazing. Greater profitability comes because every cow can produce a calf to sell. Operational simplicity reduces cost and adds to profit. Improved grazing will ultimately add to carrying capacity and profitability.

Not buying bred heifers? You must recognize that they have the

two toughest years of their lives in front of them, plus translocation to your place. Many bred heifers offered for sale have been overdeveloped. Thus, some of them are pregnant and in good condition because of feed and not because they are highly fertile and fit a tougher environment.

Maternal matings only IF you can sell bred cows? If you can sell a good number of bred cows for a premium price each year, you can be as profitable as those who terminal-cross.

Moderate size and milk? You can simply run more cows on the same land if they are smaller and give less milk. You will wean more pounds of calf per acre and sell those pounds for more money. Smaller cows giving less milk are more fertile in most environments.

Exposing most of the heifer calf crop to bulls for a short period of time? Even with EPDs and genomic testing, no one can select heifers for your ranch as accurately as the bull and nature. Regardless of any other genetic differences, heifers that calve later as 2-year-olds cannot live long enough to catch up with those that calve early. Remember, this is your cow herd. It is supposed to be profitable every year.

Minimal development of replacement heifers? It costs less. The heifers that are truly, innately fertile are the ones most likely to

breed. Research is showing that heifers can breed reasonably well when they reach 55% of expected mature cow weight. If you are calving in sync with nature, you will get good conception rates; the open heifers will be profitable as feeders because of lower cost.

Selecting bulls from cows that always calve in the first cycle for maternal herds? I personally think the heritability for first-cycle conception in heifers and for calving interval between the first and second calf is higher than most of the estimates we see for fertility.

Selecting the right seedstock provider? Commercial cattle producers have paid so much money for the wrong kind — high-growth, high-carcass — for so long that seedstock providers are incentivized to do the wrong thing for commercial maternal herds. You need to find someone who will help you find bulls to produce functional and efficient females — moderate size and milk, physical soundness, high fertility on low inputs, calving ease, survivability and good longevity. The seedstock provider should help you include heterosis for better fertility and survivability in your cows. ■

Charolais Bull Introduction

Hybrid Vigor Works. Depends on the producer's marketing program if they want to use it or not. Putting the right proven pieces together is the key. The data is now available to do that, unlike in the 1970 helter skelter programs.

Charolais are the highest marbling of all continental breeds. Many Fink customers are hitting 97-100% choice and prime on Angus, Red Angus and Baldie females. That's around 13-14 months, calf feds and rarely a yield grade 4. That kind competes with catfish, chicken and pork!! Not all cattle can do that, 45-60 days more feed time, higher death rates in feedlots and fatter cattle are not the answer.

We have said this for many years, with selection, as should be for any replacements, the best cows we have seen that hold their condition, breed back, and raise thick power calves are Char cross females. More producers are discovering that every day. Plus, they work in all climates. Hybrid Vigor again at work. Several Fink customers are running these cows currently.

Our industry has marbling at the highest rate ever recorded. That is great for consumers! But sadly, in doing that yield grade 4/5 cattle have also increased, as a direct result of not enough pounds of red meat. Too much "white" fat cost lots of money to put on a carcass. Trim the "white fat" genetically. It's very possible!!

We started Charolais as an option for customers to blend hybrid vigor with a quality carcass. More red meat yield and a "terminal" (and a potential maternal) end product with more pounds (free) for some customers, it works!

White bulls handle the heat very well. In some of the toughest climates we have customers in. White bulls are out breeding, and others are hiding in the trees, FACT!

Not all white bulls are created equal like any other breed. We have been fortunate to line genetics up that grow, yield, have quality grade, and rank at the top of the breed for TSI, Marbling, Weaning, and Yearling weights, are just a few, along with acceptable birth weights and unbelievable disposition.

Charolais 18 Month Old Bulls

ALL of these bulls were semen checked in May - and all passed a complete BSE. These ARE NOT carryover bulls because of fertility. Of course they will be rechecked for the sale.

These bulls are pretty good and are ready to go to work! Some potential Seedstock bulls among them.

Retaining possession of Lot 90 (2126) until Jan. 1, 2024. If you have questions please call.

The dam "7982" is the only female we have never priced to anyone. She hits every time. Dam of our top selling bull this Spring to Wade Small, Idaho; Cody Rumpf, Kansas; and Matt Hebbert, Nebraska at \$41,000. Tom Greco, Astro Charolais at Topeka, Kansas bought a flush and has had great success with that. We have retained every daughter so far.

The cow family was started in our startup days with embryos purchased. We tried to buy the dam, but Dave Johnson, manager of Southern Cattle in Florida at the time, was determined to own her.

Cattle producers from Lithuania.

This set of brothers came in lighter at weaning from the recipient herd. It won't affect their genetics. They have been on a 2-2.5 lb. gain with no shade in a tough summer. We don't run a fattening program.

5 full sisters to these bulls are pretty decent!! In the August evaluation one of them is NUMBER ONE in the breed (not percentage) for weaning wt., No. 13 for yearling wt., No. 1 for Carcass wt. and No. 28 for TSI. Rest of EPDs look pretty good also!!

97

This bull is much more than just EPDs. His family heritage is pretty decent. These kinds of bulls will make power sets of steers and nice replacement heifers.

Bull purchases represent your herd good or bad and it takes at least 5 years to find out.

Age of the dam (2010) pulls these bulls EPDs down some, but they are pretty decent. "023" is the dam of "LCC 6333" that sold for \$24,000 and is still the #1 Marbling female in the entire breed. Not as important to some, but here it is. She has perfect feet and a great udder, yet!

*Controlling cow input costs -
may be the profit center in a cowherd!*

The best bull of any breed that we have worked with. Disposition that he passes to his calves is unbelievable. At the age the EPDs are normally depressed by younger bulls (with less accuracy), Gold Standard is still top 20% WW, 15% YW, 3% Carcass and 15% TSI. Considering all traits, he may be one of the most proven, balanced bulls in the breed. Generally a teat and udder improver on his daughters.

Tank out of the most recognized cow family in the entire breed for marbling, Larsons Lady Family. Want to make a powerful set of thick topped, high yielding, good quality feeders? Turn this bull out in your pasture.

Semen check bulls 45 days before turnout and you will save a lot of heartburn!

Bull purchases represent your herd good or bad and it takes at least 5 years to find out.

These kind of bulls will give a producer 1400-1500# steers at 12-15 months, not extra fat, but still a high marbling product for consumers. Personally I don't like 30% of fat in my Ribeyes, I doubt few consumers do either! Makes it pretty high priced when 30% is left on the plate.

This bull is not as attractive, but whoever leaves with him will have a great time selling or feeding his offspring. Another rare minus fat, but still high marbling. Super Terminal sire - embryo bull that came in lighter off the recipient dam. Note the number of #1 and #2's in percentage rankings, that is of the ENTIRE breed!!!

Ken Griener family at Brittney & Kory's wedding in March.
The Griener family are great friends in Florida.

Bull purchases represent your herd good or bad and it takes at least 5 years to find out.

Gold Standard sons, continued

Charolais Reference Sire

Full brothers to the "Free Lunch Sisters" of Larsons that are noted as the highest marbling cow family in the breed. They also have growth, excellent "kind" of cows with great udders and feet. We brought "923" back this past spring to collect a semen bank. Since he was an embryo his EPDs start from 100%. They will continue to elevate on growth as more data comes in on him. Great feet, great disposition. His sons were well received in this Springs bull sale.

Embryo bulls that came in at 525# and 519#. That will not change what they can do in their calf crops. Lack of milk the first 7 months will show up. In 3 years they will look a lot different standing in a group of calves sired by them weighing 650#. Out of one of the power cows we ever had.

*Bulls and females can be viewed online at
finkbeefgenetics.com or dvauction.com.

Charolais Reference Sire

Penny Flash is a proven growth and marbling sire. We don't recommend him for replacement females. He leans more terminal. If you feed your own cattle, or want repeat buyers for your cattle that do feed, these bulls can get it done.

Fall 2022 Charolais Bulls

A younger bull, do not use for replacements BUT for terminal he will be excellent. The thick topped calves will be there. Overlook his size due to early milk growth.

IF YOU LOOK AT NOTHING ELSE IN THIS CATALOG, PLEASE LOOK AT THIS:

Let the Cow Save You Money, and the Bull Make You Money

By Kris Ringwall

*We've reprinted a portion of Kris' article, with permission,
Let the cow save you money and the bull make you money, below.*

Read Kris' full article and others at:

www.ag.ndsu.edu/dickinsonrec/beef-talk-articles-1

... Second, recognize the importance of monitoring cow size. The maintenance of excessively large cows has proven difficult to offset with increased weaning weights. The center has targeted mature cow size at 1,100 to 1,300 pounds. Although individual calf weights will be lighter, total calf weight based on calves produced per acre will be greater, resulting in more total pounds of calf.

Third, recognize the importance of good bull selection using technological advancements that improve accuracy. Generally, keep expected progeny differences (EPDs) above the 50th percentile within the desired traits and breed. As matter of practicality, become comfortable with bulls that are above the 50th percentile but may not exceed the upper 30th percentile for commercial production.

Fourth, recognize the value of breeding systems, maximizing the traits of interest in the terminal sire program while balancing appropriate traits on the maternal side. Let the cow save you money and the bull make you money.

Copperhead Bull Introduction

1/2 Charolais x 1/2 Red Angus (started in 2017)

We believe in options for customers. Everyone's program needs to be geared to fit and make the most profit for their operation. We all make decisions every day in ranching and farming, like feed, seed, etc. Genetics from Finks is the same way.

If we didn't believe in options working for customers, we wouldn't do it. These bulls are working! Plus, they are generally light colored for heat, and add a "red" hide option for many customers!

Copperheads are the result of finding Red Angus. A.I. bulls that have some data on them that include controlled birth weight, carcasses, and still excellent growth. We then A.I. all our virgin Charolais heifers (not just the lower end) to these bulls, to create Copperheads. These are not just cross bulls!!!

Customer feedback from New York, West Virginia, Georgia, Florida, Missouri, Kansas, Oklahoma and Texas have been excellent. Number one thing mentioned is fleshing ability on the bulls. They hold up and get cows bred and the calves have a touch of extra Charolais muscle in them.

We highly recommend Copperheads for making replacements if desired also. That input of Charolais on a set of Red Angus, Beefmaster, Brahman, etc. based cows can give that hybrid vigor to a set of cows to control cow size, more muscle, and longevity.

Remember Fink virgin females, which are the newest and freshest Charolais genetics we have, are the dams of most of these bulls! Red Angus sires are highly selected also!

Always a power set of bulls - moderate framed, thick, deep, huge testicles, fertile! Copperheads recommended for replacement females are marked at the bottom of each footnote.

Copperheads used on straight black Angus cows (none with red genes) you should expect black hides, a few may have black hides and smokie hair.

Red Angus Reference Sires

Peltons Wideload 78B

RAA#1704763

We have used Wideload for a couple of years and really like what we get. He's average in the Red Angus breed for birth weight, top 40% YW and top 9% Marbling. He's backed up by females from the Pelton herd in LaCrosse, KS who we have a lot of respect for.

Schuler Rebel 0029X

RAA#1382355

Rebel was born in 2010 and has been used for many years in the Red Angus breed. He has been a semen selling giant for heifers. He sired beautiful females and light birth weight.

STRA Relentless

RAA#3955293

We have used Relentless this past year for trying to keep our Copperheads on a replacement, and feeder type genetics on cowherds. He's in the top 2% for low birth weight, and 1% for marbling.

Fall 2022 Copperhead Bulls

212

FINK 2044 OF 0437 WIDE

DOB: 8/04/2022 Reg #: MP5238 Tattoo: 2038

Wideload x Gold Standard x Free Lunch

Dam is in the top 10% WW, 8% YW, 1% CW, 2% Marb., 5%TSI.
Reddish, deep, thick, moderate framed bull. Scan data on these bulls look pretty good also, and it's not fat cover that increase the IMF, as in most cases. Replacement Females.

222

FINK 2041 OF 0434 WIDE

DOB: 8/01/2022 Reg #: MP5240 Tattoo: 2041

Wideload x Free Lunch x Gold Standard

Dam is in the top 7% YW, 3% CW, 1% Marb., 3%TSI.
Some would call this bull extremely complete, we wouldn't argue at all! Copperheads can be used in a variety of ways. Most will use them to improve muscle, and moderate cow size, plus add fleshing ability. Replacement Females.

223

FINK 2043 OF 0436 WIDE

DOB: 8/19/2022 Reg #: MP5259 Tattoo: 2043

Wideload x Free Lunch x Gold Standard

Dam is in the top 15% WW, 15% YW, 5% CW, 2% Marb., 7%TSI.
Light colored, deep, moderate framed, and thick. Think these footnotes are all alike? Bulls are peas in a pod! Replacement Females

Fall 2022 Copperhead Bulls

224 **LCC 2080 OF 8858 WIDE**
DOB: 8/24/2022 Reg #: MP5219 Tattoo: 2080

Wideload x Free Lunch x Gain & Grade

Dam is in the top 8% BW, 7% CE, 2% Marb.

A light colored Wideload. These bulls can be used in many environments and for many purposes, like replacements and feeders! Replacement Females

230 **FINK 2355 OF 0433 DP**
DOB: 8/31/2022 Reg #: MP5267 Tattoo: 2355

Draft Pick x Free Lunch x Gold Standard

Dam is in the top 4% WW, 2% YW, 1% CW, 4% Marb., 1% TSI.

A light colored Draft Pick son that is nicely made. We have used Draft Pick in the past with good results.

225 **FINK 2052 OF 0455 WIDE**
DOB: 8/03/2022 Reg #: MP5248 Tattoo: 2052

Wideload x Gold Standard x Free Lunch

Dam is in the top 15% YW, 3% CW, 1% Marb., 4% TSI.

Wideload - Gold Standard - Free Lunch, now that's some powerhouses in his pedigree. Replacements on a set of red based females!! Copperheads are slick haired also. Many are working in Florida on some of the highest profile ranches. Replacement Females.

231 **NH 2704 0386 REBEL**
DOB: 7/28/2022 Reg #: MP4770 Tattoo: 2704

Rebel x Gold Standard x Free Lunch

Dam is in the top 6% Marb., 20% TSI.

Rebel sons make great replacements. He is a high proven sire. Great udder and teats, moderate framed and productive. We purchased his dam from Nick and Tara Hargrave in last Falls Female Sale, because of his cow family. Replacement Females.

226 **FINK 2049 OF 0451 WIDE** Scurs
DOB: 8/02/2022 Reg #: MP5261 Tattoo: 2049

Wideload x Flash x Gold Standard

Dam is in the top 5% WW, 2% YW, 5% CW, 15% REA, 1% Marb., 1% TSI.

Light colored out of one of our top young Charolais females. Remember these are planned matings making Copperheads. That's why customers are using them with excellent results.

232 **FINK NH 2209 0368 REBEL**
DOB: 8/01/2022 Reg #: MP5270 Tattoo: 2209

Rebel x Patriot x Grid Maker

Dam is in the top 15% CE, 40% TSI.

Tan colored Rebel son with potential use on heifers. Dam is a lighter birth weight female. Rebel will leave some of the best females of any breed. Replacement Females.

227 **FINK 2034 OF 0249 WIDE**
DOB: 8/06/2022 Reg #: MP5235 Tattoo: 2034

Wideload x Lock N Load x Free Lunch

Dam is in the top 7% WW, 5% YW, 15% CW, 1% Marb., 3% TSI.

Moderate, deep, thick, compact made bull but still has the pounds. Nice individual to use on a set of females to keep replacements. His grandam is the only female we have never put a price on - and we have been asked several times.

233 **FINK 2031 OF 0244 WIDE**
DOB: 8/20/2022 Reg #: MP5258 Tattoo: 2031

Wideload x Flash x Free Lunch

Dam is in the top 15% YW, 1% Marb., 2% TSI.

Complete made Wideload with some of the highest proven marbling genetics in the breed. Satisfy the consumer and make keeper cows, get to do both.

228 **FINK 2040 OF 0314 WIDE**
DOB: 9/07/2022 Reg #: MP5239 Tattoo: 2040

Wideload x Gold Standard x Grid Maker

Dam is in the top 1% WW, 1% YW, 1% CW, 1% TSI.

Thickness!!! Please look this bull up, a moderate framed Wideload son. Gold Standard dam, and she ranks in the top 1% of the breed on the above 4 traits. Replacement Females.

234 **FINK 2032 OF 0246 WIDE**
DOB: 8/01/2022 Reg #: MP5233 Tattoo: 2032

Wideload x Free Lunch x Flash

Dam is in the top 20% CW, 1% Marb., 8% TSI.

Thick, deep, moderate, touch easy top will describe this bull. Very typical Wideload. We loaded up on Wideload semen this Spring. This set of bulls says it all, plus their disposition.

229 **FINK 2211 OF 01 NW**
DOB: 8/17/2022 Reg #: MP5274 Tattoo: 2211

No Worry x Lock N Load x Gold Standard

Dam is in the top 7% WW, 4% YW, 4% CW, 7% Marb., 3% TSI.

Very nice No Worry son, we have sold several of these in past sales. We would still be using him if we could get sexed male semen. Producers may like this bull, we do anyways!

235 **LCC 2039 OF 0307 WIDE**
DOB: 8/06/2022 Reg #: MP5232 Tattoo: 2039

Wideload x Lock N Load x Free Lunch

Dam is in the top 6% YW, 7% CW, 1% Marb., 2% TSI.

Plenty of growth on carcass here! Lots of good Larson cows in this pedigree.

Fall 2022 Copperhead Bulls

FINK 2048 OF 0477 WIDE Scurs
 DOB: 8/07/2022 Reg #: MP5245 Tattoo: 2048

Wideload x Flash x Gold Standard

Dam is in the top 5% YW, 2% CW, 1% Marb., 2% TSI.

Light colored, thick, imagine a set of females out of these bulls. Use this bull with that thought in mind. Remember great big bulls of any breed, generally make great big cows, may not be the ideal thing!

FINK NH 2210 0382 REBEL
 DOB: 8/01/2022 Reg #: MP5271 Tattoo: 2210

Rebel x Gold Standard x Free Lunch

Dam is in the top 8% Marb.

Rebel son that should sire beautiful females from any breed of cows! You will wonder when he is a three year old where he came from out in the pasture as he matures. Replacement Females.

FINK 2042 OF 0435 WIDE
 DOB: 8/18/2022 Reg #: MP5241 Tattoo: 2042

Wideload x Free Lunch x Gold Standard

Dam is in the top 5% WW, 2% YW, 2% CW, 2% Marb., 1% TSI.

Lighter colored, moderate, thick, and complete. Broken record here but Wideloads are easy to look at. Dam is one of our top young cows. Replacement Females.

FINK 2213 OF 08 WIDE
 DOB: 8/08/2022 Reg #: MP5276 Tattoo: 2213

Wideload x Free Lunch x Bluegrass

Dam is in the top 10% WW, 15% YW, 1% Marb., 9% TSI.

Moderate framed bull off a first calf heifer that will be behind some on sale day. If we chose to fatten our sale bulls these would be able to catch up. Fat bulls make for problems on semen, feet and longevity.

FINK 2035 OF 0297 WIDE
 DOB: 8/26/2022 Reg #: MP5236 Tattoo: 2035

Wideload x Flash x Gold Standard

Dam is in the top 10% YW, 1% Marb., 2% TSI.

Same deal as previous Wideloads. Do you have large groups of cows to breed? Put a set of Copperheads on them, feeders that hit the high premiums.

FINK 2361 OF 0490 RELENTLESS Scurs
 DOB: 8/08/2022 Reg #: MP5263 Tattoo: 2361

Relentless x Gold Standard x Free Lunch

Dam is in the top 15% WW, 7% YW, 6% CW, 3% Marb., 5% TSI.

Potential heifer bull. Relentless sons are light birth weight, generally a touch lighter boned.

FINK 2033 OF 0247 WIDE
 DOB: 8/07/2022 Reg #: MP5234 Tattoo: 2033

Wideload x Lock N Load x Gold Standard

Dam is in the top 4% WW, 3% YW, 1% CW, 5% TSI.

Complete made! These bulls have been on a ration designed for 2-2.5# daily gain. Look at their condition. Dam's EPDs aren't to bad!!

FINK 2356 OF 0485 DP
 DOB: 8/09/2022 Reg #: MP5266 Tattoo: 2356

Draft Pick x Lock N Load x Free Lunch

Dam is in the top 3% WW, 1% YW, 1% CW, 6% Marb., 1% TSI.

Lighter colored Draft Pick with a first calf heifer dam that ranks high in several traits of importance!

FINK 2212 OF 07 NW
 DOB: 8/16/2022 Reg #: MP5275 Tattoo: 2212

No Worry x Patriot x Polled Value

Dam is in the top 7% CW

No Worry, as mentioned previously, if we could get sexed male semen we would still be using him a lot more. Many of the bulls working across the U.S. are No Worry sons. Replacement Females.

FINK 2358 OF 0444 RELENTLESS
 DOB: 8/27/2022 Reg #: MP5264 Tattoo: 2358

Relentless x Lock N Load x Gold Standard

Dam is in the top 6% WW, 1% YW, 1% CW, 15% REA, 6% Marb., 1% TSI.

Relentless son that could be considered on heifers if needed for that. EPDs on the dam certainly indicate that!

FINK 2050 OF 0453 WIDE
 DOB: 9/05/2022 Reg #: MP5246 Tattoo: 2050

Wideload x Gold Standard x Grid Maker

Dam is in the top 5% WW, 8% YW, 4% CW, 15% TSI.

Moderate framed, cowmaker. Replacement Females.

FINK 2360 OF 0446 RELENTLESS
 DOB: 8/11/2022 Reg #: MP5262 Tattoo: 2360

Relentless x Lock N Load x Gold Standard

Dam is in the top 7% YW, 15% CW, 3% Marb., 2% TSI.

Complete made bull, behind from him having a first calf heifer dam but he's catching up. Probably wouldn't save replacements out of him, but he should sire nice feeders.

Fall 2022 Copperhead Bulls

248

FINK 2357 OF 0488 DP

DOB: 8/07/2022

Reg #: MP5265

Tattoo: 2357

Draft Pick x Free Lunch x New Standard

Dam is in the top 10% CW, 1% Marb.

Tan colored Draft Pick son that weaned off lighter due to dams milking. If you need a set of feeders his #1 Marbling and 10% Carcass wt, in the Charolais breed, will have nothing to do with his weaning weight.

250

FINK 2354 OF 0296 DP

DOB: 8/31/2022

Reg #: MP5268

Tattoo: 2354

Draft Pick x Lock N Load x Free Lunch

Dam is in the top 15% YW, 6% CW, 3% Marb., 6% TSI.

Moderate framed, Draft Pick son whose dam is a first calf heifer. Terminal end point here. Bet they hang well!

249

FINK 2353 OF 0250 DP

DOB: 8/13/2022

Reg #: MP5269

Tattoo: 2353

Draft Pick x Gold Standard x Free Lunch

Dam is in the top 3% WW, 4% YW, 3% CW, 6% TSI.

Darker color, moderate framed, out of a lighter milking first calf heifer. Gold Standard - Free Lunch - Bluegrass cow family.

*Bulls and females can be viewed online at
finkbeefgenetics.com or dvauction.com.
Watch the website for details and posting dates.*

Copperhead Bulls at work!

Female Offering

~ Charolais Fall Pairs and Open Heifers
~ Angus Spring Bred Females, Fall Pairs and Open Heifers

WILL SELL IN CATALOG ORDER

Insurance

Buyers are encouraged to insure your purchases, for any unfortunate mishaps that may occur in trucking etc.

Pregnancy Status on Angus Females:

Spring calving Angus females will be ultrasound checked approximately September 15th. They will be checked again close to sale time and updates will be on our website and announced sale day. All confirmed bred females will be guaranteed 45 days pregnancy after sale day. Notification must be made immediately to us if there is a problem.

Fall Calving Females:

All females will calve before the sale. We will have calving dates updated on our website as the sale gets closer. Dates listed are what is expected.

Delivery:

Delivery on females is at buyer's expense and risk. We will certainly help with arrangements if possible. We cannot load bred females, baby calves, etc. with bulls for safety of the females. If we coordinate delivery, we will guarantee a maximum of \$500 per lot. If we can get it done cheaper, we will by all means do so. We cannot guarantee delivery to your doorstep. When we have loads of cattle, we ask buyers to meet livestock haulers on their route which may not always be in the daytime, plus most will need to be met on Interstate Highways.

Charolais Females

Every sale we sell a few females, this fall we are offering females that several have tried to buy privately. Ages on females are excellent, fall babies at side, many have been flushed and backed by the best families at Fink, Larson and Hargrave.

The open heifer offering is exceptional! We have more heifers than we have room for! Silver Gun 467 daughters sell, try to find even one for sale anywhere, plus two really nice Benaiah's, Gold Standards, Tank, PLUS a couple of LLC 923" daughters! Watch for the videos of all of these females. Our patience level for pictures isn't very good! But all will be videoed and available approximately Oct. 5th. EPDs printed are from August 2023 evaluation. Finks would be open to doing a joint merchandising program on any resulting bull calves born fall 2023, including Copperhead bull calves.

Penny Flash son we collected and breeding cows. His dam is one of good ones! His grandam "023" and great grandam "6868", are arguably the highest marbling cow family in the World. PA Free.

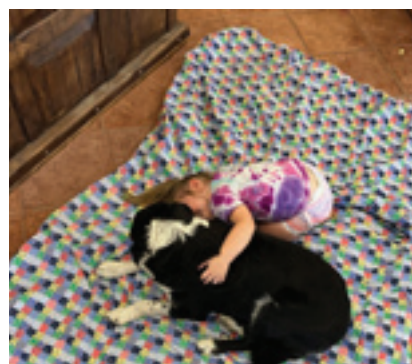

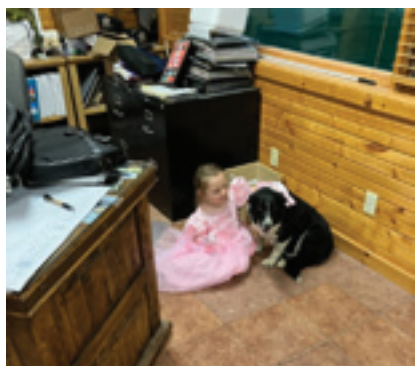

Open Charolais Heifers

This is an offering of some very nice heifers. We have to make room due to grass (due to not enough and drought) currently on going.

Many of these females will end up being donors for whoever buys them. They are that "kind" - PLUS EPDs that rank very well in the breed. We tried to put together a group of various sires that we are using. Semen on many of them is hard to find or unavailable.

Footnotes will be short on these. Please call e-mail etc. for more detailed information.

REST ASSURED all conversations are confidential. We do not share inquiries with anyone! Bull sales are handled the same way.

Buyers Choice

We can't decide where to start so: Selling Choice on Lots 251 & 252 to high bidder - then we'll sell the other one!

The dam is sired by Fink 2250 a sire used very successfully, by Cliff Raile at St. Francis, KS. Many sons of Fink 2250 have worked in registered herds across the U.S. Of course New Standards cow family is outstanding. This female is double bred to the M6 248 female that worked at M6, Finks, C5 Charolais, Harlan Hecht and Southern Cattle Co. Silver Sage is a 467 son we sampled from Jeff Roman in Oregon. PA Free
Heifer calf at side by RR Silver Sage 0022, born on 8/24/23.

Butch McCracken Family - long time customers and one of the top ranches in the U.S. Tons of carcass data on top of everything.
Mike and Crystal McCracker accepting the award for Butch.

Gary Luttmann Family. Friend for over 40 years!
No person works harder that we know of.

Angus Females

Our program has been balanced for all traits, the best we can. We have seen all the ups, downs, chases, etc. possible in the beef industry. Generally the commercial producer is the one that ends up caught in the mess, by following purebred races. That is why we try to stay middle of the road on Angus maternal genetics.

The females selling are over 4 decades of this program. We have passed up a lot of "quick money" by not chasing fads. Most of these females have been donors. We continue to "overfill" our grass availability, thus these sell.

There are 5 fall heifer calves that are selling also by Barracade and Resilient as special attractions.

Genetics offered are somewhat outcross for many. We concentrate on the total MATERNAL Angus female. Chasing growth, \$B and related traits spells terminal to us.

Cowmaker is the \$9,500 top selling 11127 son from our Fall 2022 sale, going to Dr. Shan & Shelly Hullman, longtime customers from Pratt, KS. Shan is a vet and he checks feet, fertility, and all the extras when he buys! This bulls dam sells in this sale also. We retained pasture use last fall so we could get calves out of him, plus we collected him. Right bull, right time, right kind. Clean-up on fall bred cows.

*Bulls and females can be viewed online at
finkbeefgenetics.com or dvauction.com.
Watch the website for details and posting dates.*

A beautiful female we have flushed. A portion of Angus seedstock producers act like the breed has a marbling problem, not sure when that was supposed to have happened? Fink customers have been harvesting 98-100% choice or higher, 50% CAB at 12-14 months of age for decades. Now the industry is feeding 45-60 days longer, twice as fat on carcass and aging cattle before the feedlot or grass. Not sure how that fits profit against chicken, fish and pork? Past donor.

Bull calf at side by Sitz Barracade, born on 8/24/23.

These are the kind of females that we like to surround ourselves with and have always tried to do so. Dam of this female sells in this sale. She is a beautiful WAVE daughter. Wave is one of the most unique bulls in the breed. His marbling was the result of high IMF scan, but low rib fat!!! Look at the fat today on high scanning bulls. Not a good direction? Six generations of donors behind this female. Past donor.

Bull calf at side by Tehama Testiment, born on 8/12/23.

Nice Chisum 6175, yes we are not afraid to use older proven bulls and have done so in our program for nearly 40 years. In todays "Flash in the pan" races on some EPDs, breeders may be going backwards faster than ever before? Just a thought! I know scrotal, Heifer Pregnancy, mature wt. EPDs are headed one direction, and it's not good.

The dam of this perfect uddered WAVE daughter was one of the best "Misses" we ever owned. She is now a donor for Tom Greco. Moderate framed, beautiful uddered, thick and deep chested. Probably every Angus cow in the U.S. should look like her. Guess what "8130" on the pedigree is, Damerons original "Miss" they bought from us! Past donor.

Heifer calf at side by Mohnen Substantial, born on 8/10/23.

We held this bull back from our spring sale to breed some cows to this spring. Justified has done a nice job for us, we rarely breed cows naturally except for a few times in 40+ years. When we have a bull we want to get a few calves out of, we hold him. He will sell in this sale.

Sale attraction for folks looking for maternal, fertility, scrotal and heifer pregnancy. Here is a female loaded with proven bulls. Note EXT, Resource and backed up with the "Miss" family. Over six generations of donor females on this dams side. Again no extremes in any direction! Extremes are easy to do, balance is hard. Complete outcross for many operations. "11127" daughters will make up over 50% of our future cowherd! There is a reason why!!

Full sister to the female that will start the fall calving females! Make note same power, good udder, depth (natural) and goodness. EPDs are important, but in all breeds they have caused races for extremes, because it's easy to read. I wonder how much potential fertility, structure, and do ability maybe lost in such races? Watch EPDs in ALL traits it's not hard to see. Past donor.

A pretty decent "4404", we flushed this female. The "Donna family", the late Bill Brooks owned the original Donna female. They are fertile, moderate framed, great uddered females! He created a great herd, but due to his passing at 35 it was dispersed. Sinclair and KMK in Tennessee bought many of the embryos. Donna originated from the Coleman herd in Montana.

Only because we are offering older donors that are still in prime time production would this female sell. We have flushed her quite a bit. Forget her EPDs as older bulls get moved down over time, but they hold their own as to what they actually can get done. We are sure wondering where the "speed of sound" breeding programs will end up, how far off is 300# YW and a \$C of 500? EPDs breed faster and faster, the wall could be coming faster and faster also.

Overdrive, Final Answer and 5522, doesn't get much better than that. Some of the best ever females to walk were 5522 daughters, and yes we keep making a few along. Nothing special to look at until they are three years old and in production!

Exposed to Fink 2502 of 9837 Just from 6/08/23 to 8/10/23.

Open Fall Born 2022 Heifers

These females are offered as attractions only. Very few Barricade daughters will be offered, as semen is very limited and he is one of the most popular bulls in the country.

Two Resilients are also offered out of two of our best females, not bred for EPDs only. Feet and udders have been on our radar for over 30 years, not just recently. Nor will we give up and use extreme EPDs to make fashionable EPDs. Cows with horrible udders, horrible feet or poor fertility don't cut it here.

The dam "7318" has a perfect udder and shows three calves at 106 WW ratio. Not showing on the dams pedigree, in the next generation back, is Net Worth!! This is the kind of EPDs we like. Solid across the board, no extremes. Extreme EPDs in one or two traits is easy to do. Generations of stacked pedigrees with "balance" is much harder and takes generations. We know which is best for the breed, and commercial producers.

A nice heifer with an excellent pedigree. Should make an excellent cow. Nothing but super udders on the dams side of this pedigree. Not showing in the next generation back is Net Worth!

Semen

Semen selling is stored at KABSU in Manhattan, KS. None of this is "trader" semen. The shipping and handling charges will be the buyers responsibility. **Please e-mail a complete ship to address (no P.O. Box), phone number and time frame for shipment to Finks. This can save problems and get shipments out quicker.**
